Message from Chairman CII-Sohrabji Godrej Green Business Centre

Dear Friends,

I am delighted to witness the transformation of the green product market in India, facilitated by the GreenPro Ecolabel. With over 9,500 ecolabelled products and materials now available, this initiative marks a significant milestone. Congratulations to the Green Products and Services Council and all companies that have achieved the GreenPro Ecolabel for their commitment to sustainability.

It's essential for developers and construction companies to adopt green procurement practices and prioritize ecolabelled products and materials. This strategy not only fosters sustainability but also aligns with business objectives. The GreenPro framework will support organizations in implementing effective green procurement.

The release of the 5th Edition of the Directory on GreenPro Ecolabelled Products is an excellent step forward, empowering end users to make informed, eco-friendly choices. I Congratulate, Mr. Unnikrishnan A R, Chairman, Green Products and Services Council and all the Council members for this excellent initiative.

Wish you all the Best!

Jamshyd N Godrej

Chairman,

CII- Sohrabji Godrej Green Business Centre

Message from Chairman Green Products & Services Council

Dear Friends,

Today, adopting green practices is not just a choice but a necessity for a sustainable future. The Indian industry is gearing up to embrace these practices in alignment with global market trends and India's commitment to achieving Net Zero. Manufacturers are increasingly focused on producing products, materials, and technologies that have a lower environmental impact.

A significant challenge for the construction industry is identifying and incorporating the right green products, materials, and technologies into their projects. Stakeholders are keen to understand what truly constitutes a green product. To address this, CII has launched GreenPro, a Type-1 Ecolabel based on ISO 14024, to guide stakeholders in making informed choices.

So far, over 9,500 products from more than 450 companies have achieved the GreenPro Ecolabel, with an additional 6,000 products aspiring to meet these standards.

The GreenPro Directory serves as a valuable resource for end users, enabling responsible sourcing of products. We have made concerted efforts to ensure this directory is comprehensive and beneficial for architects, developers, and construction engineers.

I am confident that the 'Directory on Green Products, Materials, and Technologies' will be an invaluable asset to all of you.

Unnikrishnan A R

Chairman,
Green Products and Services Council

Introduction

The Green Building movement spearheaded by the Indian Green Building Council (IGBC) has gained significant momentum and achieved green building footprint of 12.307 billion sq. ft. This has created enormous demand for credible green products, materials and technologies.

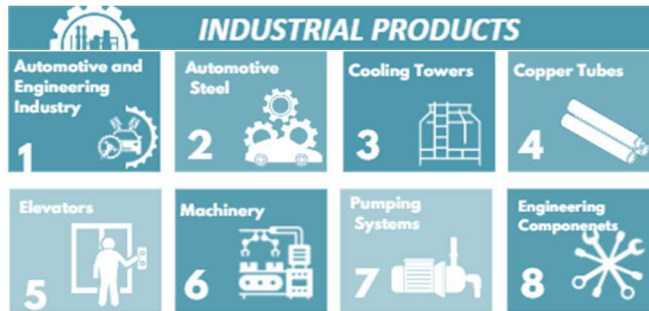

To facilitate the Architects, Developers and builders to choose the right green products, materials and technologies for contribution, operation and maintenance of green buildings, CII has launched 'GreenPro' - an Ecolabel based on Life Cycle Approach. GreenPro has certified 9500 products manufactured by leading organizations across 33 product categories which accommodate 95% of building and construction materials.

The EcoLabelled green products contribute significantly for enhancing the performance of Green Buildings in terms of reducing resource consumption and enhancing the health and well-being of the occupants. These EcoLabelled products contribute to Green Buildings in the following areas:

1. Energy Efficiency
2. Indoor Environment Quality
3. Materials and Resources
4. Water Management
5. Waste Management
6. Sustainable soils

This 'GreenPro' directory contains the details of the EcoLabelled products, their green features and the contact details of the manufacturers. The EcoLabelled products are included from the following product categories:

An illustration of all the building and construction products certified by Green Products and Services Council.

Note: Refer the 'GreenPro' website www.ciigreenpro.com for the certification standards for various product Categories

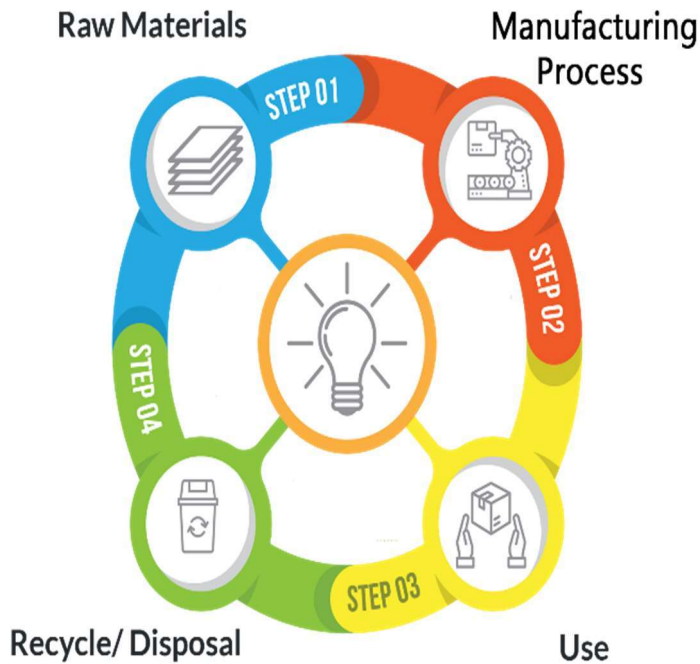

Criteria for inclusion

The directory includes only 'GreenPro' certified products which are in validity period. GreenPro adopts a 'Life Cycle' based holistic approach for evaluating the products. The comprehensive approach ensures that there are clear measurable environmental benefits during its use.

GreenPro certification standards are developed for the product categories with the support of technical committees inviting key stakeholders. Products are assessed and certified based on the respective GreenPro certification standard.

The following areas are assessed for a product to qualify as green:

- Product Design
- Product Performance
- Raw Materials
- Manufacturing Process
- Waste Management
- Life Cycle Assessment
- Product Stewardship
- Innovation

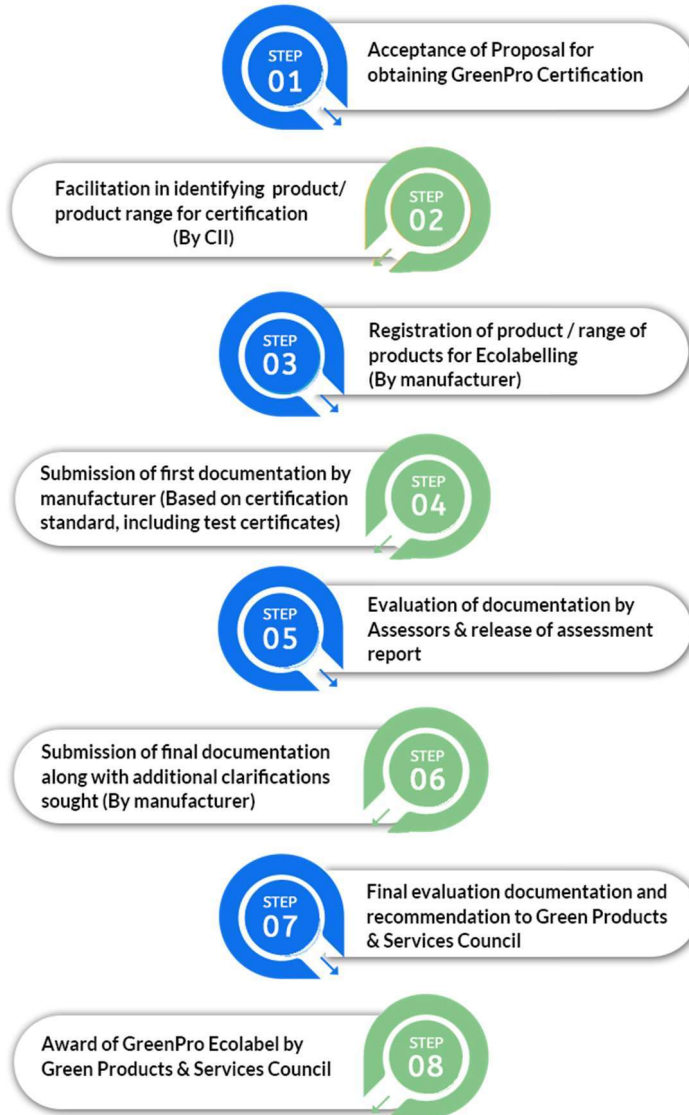

GreenPro certification process

Every product included in the directory have undergone the following process:

Validity of the Certification

GreenPro Certification is valid for 2 years from the date of award of the Certification for the product / product range. The validity of the certification for all the products is highlighted in the directory.

Benefits

GreenPro certification benefits both the end users such as Architects, developers, builders, green building consultants as well as the product manufacturers. The benefits are both tangible and intangible.

For Users

Some of the benefits for the users are highlighted as below:

1. Time and effort in carrying out due diligence in selecting a green product is saved
2. The user is assured of the performance of the product and equipment
3. Ensures Toxic and hazardous substances free products which in turn decreases “health and wellbeing” risks of the users
4. Improved product performance during use to reduce resource consumption and environmental impacts
5. Recognition and credits for achieving national and international Green Building and GreenCo (Green Company) rating system

For Product Manufacturers

Some of the benefits of GreenPro Certification for the product manufacturers are highlighted below:

1. GreenPro Certification differentiates the Green product from the competition
2. Increases the market reach out with credible and precise information on the Green features of the products
3. Enables Green product Innovation
4. Increases resources conservation through enhanced energy efficiency, water efficiency, use of renewable energy, minimization of waste etc., during the manufacturing process and hence enables increase in profitability
5. Acts as a driver for achieving environment excellence and enables innovation.
6. Complements National & International Green Building Certification Systems.

Accreditation by Global Ecolabelling Network (GEN)

GreenPro Ecolabel is accredited by Global Ecolabelling Network (GEN) through **GENICES** – “GEN’s Internationally Coordinated Ecolabelling System”. Global Ecolabelling Network is a network of Ecolabelling Organizations that advocates for Type - 1 Ecolabels based on ISO 14024 standard and articulates their credibility.

The accreditation by GEN:

Recognition by UN Environment

UN Environment has listed their 'Guidelines for Product Sustainability Information' on GreenPro Ecolabelling. The guideline includes the following aspects.

Principle – 1	Reliability
Principle – 2	Relevance
Principle – 3	Clarity
Principle – 4	Transparency
Principle – 5	Accessibility
Principle – 6	Three dimensions of Sustainability
Principle – 7	Behavior change and Long-term impact
Principle – 8	Multichannel and innovative approach
Principle – 9	Collaboration
Principle – 10	Comparability

UN Environment study reveals that GreenPro EcoLabelling is aligned with all the principles as part of the 'Guidelines for Product Sustainability Information'. A case-study developed by UN Environment on 'GreenPro' is enclosed.

Confederation of Indian Industry

Sector: Manufacturing Sector Region: Based in India, operates in India. The Confederation of Indian Industry (CII) works to support the growth of industry in India, partnering with industry and government through advisory and consultative processes.

Developed by CII, GreenPro – Green Product Certification is a product certification that helps consumers to make informed choices in the building sector. It is a seal of guarantee that the product bearing the GreenPro label is environmentally more sustainable throughout its life cycle.

GreenPro assesses ‘how green a product is’ based on a holistic framework, as well as proposing next steps to achieve excellence in environmental performance over time. The certification system guides manufacturers to showcase their products environmental performance and gain increased market reach in the green building sector.

Mindset

Life Cycle Thinking: GreenPro considers the following stages of the life cycle of the products: product design, raw materials, manufacturing process, product performance in the use phase, and at the end of life disposal / recycling. All stages are considered for awarding certification.

Hotspots Analysis: The GreenPro evaluation is based on a standard framework using life cycle approach and considering the most impactful stages within a product’s life cycle.

Mainstreaming sustainability: By highlighting possible improvements that lead to better environmental performance, GreenPro ultimately helps companies improve their products’ performance over time, while also encouraging them to apply this logic to other products in their portfolio.

Principle 1: Reliability

Gaining GreenPro certification requires third-party verification from the National Accreditation Board for Testing and Calibration Laboratories (NABL) for test reports, while CII also verifies the environmental claims made during a site visit. GreenPro Certification is valid for 2 years from the date of award of the certification for the product. At the end of the validity period, the manufacturer needs to apply for the renewal of the GreenPro certification.

The GreenPro certification is a type 1 ecolabel, based on an accepted methodology as per ISO 14024 in the relevant scientific field.

Principle 2: Relevance

A product needs to comply with certain specific mandatory requirements, which vary depending on the product category. The mandatory requirements address relevant aspects of [each product](#) in areas that make a difference to its overall sustainability performance.

The GreenPro certification highlights product characteristics that are integral to the product, i.e. its function, materials or performance. Additional improvements above the regulatory requirements in India are requested.

Principle 3: Clarity

Each certified product has a unique identification number, which makes it clear that the claim is only for the product at hand.

The respective company is entitled to use the GreenPro certification logo in all their promotional activities of the certified product, either on the packaging or the product itself. This enables the architects, developers, builders, construction engineers, and consultants to identify certified products and guides their purchasing decisions.

Consumers can visit the website, enter the unique identification number and check the validity of the certification. Certified products are easily recognized through the use of the GreenPro certification logo.

Principle 4: Transparency

Consumers can trace the information on the standard and the certification process on the website. A list of all stakeholders and bodies involved is also available publicly on the website, as well as a list of certified products and contact details of certified manufacturers.

With the information provided on the website, consumers are able to understand how and by whom the standard is developed. CII provides the evidence behind the certification, and the criteria utilized in the certification process.

Principle 5: Accessibility

Consumers can identify certified products through the GreenPro logo. Environmental features that are relevant to the GreenPro standard are communicated to consumers via newsletters and promotional media.

Monthly newsletters, awareness programs, webinars and regular e-mails are offered to promote GreenPro and educate consumers about the certification and its benefits to the environment. The details of certified products, standards and contact details are readily available on the website.

Principle 6: Three Dimensions of Sustainability

Environmental: The GreenPro certification system evaluates environmental features for products based on various performance criteria grouped under the following modules: product design, product performance, raw materials, manufacturing process, waste management, life cycle approach, product stewardship and innovation.

Social: The certification encourages the product manufacturers to incorporate or implement measures that would result in health and wellbeing benefits for the building occupants. These measures include, for example, elimination of hazardous substances and reduction in volatile organic compounds (VOC) content in the products.

GreenPro considers primarily the environmental dimension of sustainability, although it also aims to encourage social benefits.

Principle 7: Behavior Change and Longer Term Impact

CII encourages behavior change in the companies that want to be certified. After GreenPro's assessment, a report is provided for the companies with the aim of guiding them to adopt environmental measures across the product life cycle. The environmental impacts of the products are captured as part of the assessment report.

CII organizes workshops and develops activities targeted at creating awareness on sustainable procurement amongst architects, developers, builders, construction engineers, and consultants so that they can ultimately change their procurement practices. Product manufacturers are also involved in such awareness-raising initiatives.

Principle 8: Multi-Channel and Innovative Approach

CII employs multiple channels to reach out to various stakeholders through periodic webinars and awareness programs, regular newsletters featuring details of GreenPro certified products, conferences, and training programs. The details of all certified products along with contact numbers and e-mail addresses are also available on the website.

GreenPro has a multi-channel approach for information dissemination that includes a website, newsletters, awareness and training programs and conferences. However, the product level environmental performance is mainly communicated on the product itself through the label.

Cement is one of the products that can be certified by GreenPro.

Principle 9: Collaboration

The GreenPro standard is prepared through stakeholder consultation and the certification process is developed with the support of respective product committees formed under the aegis of the 'Green Products and Services Council' of CII. The participation of diverse stakeholders helps improve the public acceptance and trust of the standard process.

The product committee involves all major stakeholders of the respective product category, including product manufacturers, standard setters, conformity bodies, architects and users. Each product committee is led by an external expert.

Principle 10: Comparability

This principle states that product comparisons should be used only where it really helps the consumer to make sustainable choices. In this standard, CII opted for not addressing this aspect.

Architectural Products

‘Architectural Products’

‘Architectural Products’ include interior and exterior architectural products made from aluminum and wood polymer composite. The products include grid system for paneling, trays for caballing, junction boxes, trap doors, pergola, gazebo, railing, WPC flooring, benches, etc. The products add aesthetic and ergonomic aspect to building use and are mostly made from recycled materials.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Resource efficiency because of increased recycled content in the products
- Reduction in environment impact due to reduced use of virgin material
- Helps in gaining credits for achieving Green Building rating under the section Materials and Resources.

Companies

The following companies have achieved ‘GreenPro’ certification for their products.

- Alstone Manufacturing Private Limited
- ArcelorMittal Nippon Steel India Ltd
- Hunter Douglas India Private Limited
- Konkan Speciality Polyproducts Pvt. Ltd.
- IQUBX Pvt. Ltd.
- Shubh Composite

Alstone Manufacturing Pvt. Ltd.

About Manufacturer

Alstone is a manufacturer of Metal Composite Panels (MCP) in India, constantly on the outlook for industry innovation and challenges. Alstone, a two decades old brand is trusted by architects, builders, façade consultants, and fabricators. Alstone has the widest range of products in industry to meet unique needs of the market.

Alstone launched metal- based HPL, A2 Grade Non-Combustible Panels, and metal-based Louvers. We have our state-of-the-art production facilities in Dehradun (India) and Dubai to cater to Indian and international markets. We have our in-house high tech modern coating line to help us to deliver precise, customized products along with timely delivery under expert supervision.

Alstone has launched Zinc Composite Panels in the Indian market in collaboration with VMZINC France. Along with this, Alstone has recently introduced Alstone Alcomb Panels. Alcomb Panels are made of aluminium honeycomb structure therefore very light in weight and non-combustible (A2 grade) panels.

Green Product Features

- Free from hazardous and toxic substances.
- Use of Recycled content.
- 74% by weight contains recycled material.

ArcelorMittal Nippon Steel India Ltd

About Manufacturer

AM/NS India is a joint venture between the world's leading steel companies, ArcelorMittal and Nippon Steel. Established in December 2019, post-acquisition of Essar Steel, they are an integrated flat steel manufacturer - from iron ore to ready-to-market products. With over 600 steel grades - many substituting imports, they serve an array of contemporary industries (agriculture, automotive, infrastructure, defense, energy, etc.) and contribute to an Aatmanirbhar Bharat. Their portfolio encapsulates hot rolled coils / sheets / plates, cold rolled coils / sheets, galvanized coils / sheets, pre-painted galvanized coils / sheets, pipelines, etc. They ascribe to advancement with sustainability and envision creating 'Smarter Steels, Brighter future.

AM/NS INDIA

Green Product Features

- Energy and water efficient manufacturing.
- Water resistant and rot proof products.
- Use of recycled HDPE and saw dust in WPC products.
- Low waste generation during manufacturing.

GreenPro EcoLabelled Products

- Colour Coated Coil and Sheet

Hunter Douglas Pvt. Ltd.

About Manufacturer

The Hunter Douglas Group has its Head Office in Rotterdam. The Netherlands, and a Management Office in Lucerne, Switzerland. The Group is comprised of 167 companies with 68 manufacturing and 99 assembly plants and marketing organization in more than 100 countries. Hunter Douglas employs about 21,000 people worldwide. Major operational centre in Asia, Australia, Europe, Latin America and North America give Hunter Douglas an unmatched worldwide presence. Subsidiaries in nearly 90 countries around the world let them remain flexible in adapting products to meet local requirements.

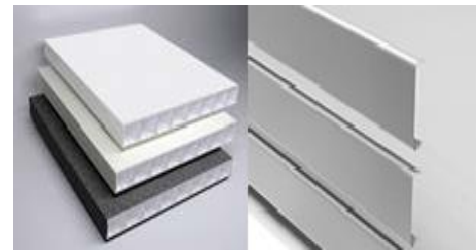

Green Product Features

- Free from hazardous and toxic substances.
- Use of Recycled content.
- Use of Low VOC coatings.
- Enhanced Acoustical Performance.

GreenPro EcoLabelled Products

- Wall Cladding
- AeroScreens
- Architectural Terracotta

IQUBX Pvt. Ltd.

About Manufacturer

IQUBX takes up the initiative to transform climate change problems into sustainable solutions through design & development of innovative, integrated & intelligent green building product system for building & interior industry. IQUBX also specializes in designing of customized product solutions for its clients in the domain of interiors and building industry. Most important aspect of IQUBX products is the holistic design strategy which focusses on using 100% recycled Aluminium, with minimum number of multipurpose and multi-use versatile components to minimize the impact on environment. Incorporating the principles of agile product development, IQUBX strives to create meaningful and customer use driven products at minimum time and cost.

Green Product Features

- A well-established green supply chain
- Mostly made from recycled aluminum
- Local procurement of scrap aluminum
- Enhanced Acoustical Performance.

GreenPro EcoLabelled Products

- Baffle Ceiling Systems
- Ceiling Trap Door
- Workstation Modular Partition Systems
- Glass Partition Wall
- Aluminum Glass Doors
- Aluminum Door Frame
- Demountable Partition Wall
- Aluminum cladding wall panels
- Carpet floor transition profile
- Floor Junction Box
- Electrical Floor Box

Konkan Speciality Polyproducts Pvt. Ltd.

About Manufacturer

KONSPEC is a premier future facing polymer technology, specialty chemicals, clean tech and material sciences solution provider. An R&D base for thousands of successful businesses across industries, and materials manufacturer to the most enduring brands, Konspec is your preferred partner to realise and empower iconic products.

With over 35 years of experience within polymer & material sciences industries, KONSPEC remains a leading purveyor of speciality compounds, masterbatches and technology-driven products for polymer processors & converters. Amassing a host of diverse business verticals and product ranges KONSPEC's offerings are innumerable, unique and cover the most stringent compliance, technical standards and boutique requirements, always one step ahead of the curve.

Green Product Features

- Made from post industrial and agricultural waste.
- Warp proof and resistant to mold.
- High Thermal Stability.

Boards, Panels, False Ceiling & Plaster

‘Boards, Panels, False Ceiling & Plaster’

This category includes boards, panels, false ceiling, plaster made from materials like gypsum, cement fiber, recycled plastic, metals and mineral fiber etc. Majority of the products are used for indoor applications. Hence, apart from resource efficiency, these products have undergone testing for compliance to Restriction of Hazardous Substances (RoHS), Volatile Organic Compounds (VOCs), Acoustic performance for enhancing health and well-being of the occupants.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Resource efficiency due to increased recycled content.
- Improved indoor air quality due to RoHS compliance and low VOC content.
- Helps in gaining credits for achieving Green Building rating under the sections of Materials and Resources, Indoor Environment Quality.

Application

Roofing sheets, paneling work, architectural cladding, partition wall system, mezzanine flooring, false ceiling, furniture making, etc.

Companies

The following companies have achieved ‘GreenPro’ certification for their products.

- Anutone Acoustics Limited
- Archidply Décor
- Archidply Industries Ltd
- DB Dazzle Modular Systems
- DECO Mica Limited
- Deeya Panel Products Pvt Ltd
- Durlum India Pvt. Ltd.
- Enwave Engineers India Pvt. Ltd.
- Ecowood Exports Pvt Ltd
- Everest Industries Ltd.
- Gipskarton India Pvt. Ltd.
- GreenPanel
- Greentek Plast
- Indowud Polymers Pvt. Ltd.
- KNAUF Ceiling Solution (Ind)
- MBI Lifestyle
- NipponPly Industries Ltd.
- Premier (Skyline Technologies)
- Ramco Industries Ltd.
- Robomatic Precon Pvt. Ltd.
- Sahyadri Industries Ltd
- Saint Gobain Gyproc India
- Senses Akustik Pvt. Ltd.
- Skydecor Laminates Pvt. Ltd.
- StrandPly LLP
- Strawcture Eco
- Times Fiberfill
- Tipco Industries
- Visaka Industries Ltd

Note: For detailed list of GreenPro Certified products under each manufacturer, refer www.ciigreenpro.com

Anutone Acoustics Limited

About Manufacturer

Anutone provides solutions with Tufbloc drywall systems that sport a metal frame, polyfibre infill and magnesium boards as skins. They boast very high ratings for water, fire, termite, impact and noise resistance. Anutone offers ceilings with virtually any surface finish, any core material which is their USP. Anutone also finishes the wall surfaces from top to bottom, side to side with functional panelling that match the decor with options in textures, fabrics, vinyls, wood, metal, cement.

Green Product Features

- Offers high acoustic performance.
- Noise Reduction Coefficient of 0.9.
- Improves indoor environment quality (noise reduction).
- Elimination of hazardous substances such as flame retardants, ozone depleting substances.

Carpet Tiles & Carpet

‘Carpet Tiles and Carpet’

Carpet tiles/Carpet are a durable, attractive and flexible flooring option that are ideal for a large number of commercial projects and can be adapted to the necessary shape avoiding wastage of resources. Carpet tile/ Carpet usage has gained significant traction in the recent times especially in the commercial arena and considerable momentum in consumer arena.

GreenPro enables the end users to choose carpet tiles which are manufactured resource efficiently and with locally sourced raw materials. It also ensures that carpet tiles used for interior applications are free from hazardous substances and VOC emissions.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Low VOC emissions.
- Elimination of hazardous and ozone depleting substances.
- Contributes to green buildings through material conservation and resource efficiency.

Companies

The following companies have achieved ‘GreenPro’ certification for their products.

- InterfaceFlor India Pvt. Ltd.
- Standard Carpet
- Welspun Flooring

Note: For detailed list of GreenPro Certified products under each manufacturer, refer www.ciigreenpro.com

InterfaceFlor India Pvt. Ltd.

About Manufacturer

Interface entered the 21st century and delivered one innovation after another. In 2000 they redefined modular carpet with the introduction of Entropy® and the emerging i2® category of products. That same year they offered the first commercial carpet collection to use recycled nylon in the face fibre and a 100% recycled content vinyl backing layer. They continued experimenting with renewable and recyclable materials and introduced our glue-free installation system, TacTiles®. Meanwhile, their Cool Blue™ process allowed them to use a wider range of materials for their backing and become less dependent on petroleum. They also formally recognised their goal of zero environmental footprint as Mission Zero®, giving a name to the journey they began in 1994.

Green Product Features

- Minimal emissions (TVOC, formaldehyde, 4-PCH, etc.) from carpets during its use.
- Use of sustainable raw materials to the tune of 62%.
- Restriction of hazardous substances in raw materials.
- Reduction in waste to landfill by takeback program and recycling process.
- Implementation of environmental impact reduction measures identified by LCA assessment to reduce carbon footprint.

GreenPro EcoLabelled Products

- Glasbac Carpet Tile
- Cushionbac Carpet Tile

Cement

‘Cement’

Under the Cement category, variety of cement products meant for making concrete, plastering, specialized applications such as water shield, corrosive resistant etc. have been covered. Green Buildings demand for utilization of only blended cements – Portland Pozzolana Cement (Fly-ash), Portland Slag Cement (Slag) and Composite Cements (Fly-ash & Slag). These cement products provide increased strength over a period of time compared to ordinary Portland cement.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Increased utilization of additives and hence reduced virgin material consumption
- Relatively higher strength compared to OPC though the setting time is higher.
- Offers excellent water and corrosive resistance properties.
- Helps in achieving Green Building rating by gaining credits under ‘Materials and Resources’ section.

Companies

The following companies have achieved ‘GreenPro’ certification for their products.

- Dalmia Cements
- JK Lakshmi Cement Ltd
- JSW Cement Limited
- My Home Industries Pvt. Ltd. – Maha Cements
- Orient Cement Limited
- Ramco Cement Limited
- Sagar Cement Limited
- Shree Cement Limited
- Star Cements
- Udaipur Cements
- UltraTech Cement Limited

Note: For detailed list of GreenPro Certified products under each manufacturer, refer www.ciigreenpro.com

Dalmia Cement

About Manufacturer

Dalmia Cement has been a leader in cement manufacturing since 1939. The cement plants are located in southern states of Tamil Nadu (Dalmiapuram & Ariyalur) and Andhra Pradesh (Kadapa), with a capacity of 9 million tonnes per annum. A leader in cement manufacturing since 1939, DCBL is a multi-spectrum Cement player with double digit market share and a pioneer in super specialty cements used for Oil wells, Railway sleepers and Air strips. The group now controls an expandable capacity of 25 million tonnes.

Green Product Features

- High utilization of slag and flyash.
- Resource efficient manufacturing process.
- Several initiatives for reducing high grade limestone consumption and environmental impact due to quarrying.

JSW Cement

About Manufacturer

Since its inception in 2009, JSW Cement entered the market with a vision to ensure a sustainable future for the country by producing eco-friendly cement. JSW Cement produces three varieties of cement: Portland Slag Cement (PSC), Ordinary Portland Cement (OPC), and Ground Granulated Blast Furnace Slag (GGBF). At Vijayanagar (Karnataka), Nandyal (Andhra Pradesh) and Dolvi (Maharashtra), JSW Cement utilizes slag from the JSW Steel plants to produce green cement. JSW Cement's flagship plant in Nandyal uses world-class technology (including the advanced Combi Finish Mode Roller Press Circuit and automated loading system) to manufacture cement. It also won prestigious awards for its energy-saving processes. With key markets in Telangana, Andhra Pradesh, Karnataka, Tamil Nadu, Kerala, Maharashtra, Orissa, and Goa, JSW Cement has been delivering high-quality products to several prestigious and large infrastructural projects in the southern and western regions of the country.

Green Product Features

- High addition of slag and flyash.
- Utilization of alternate raw materials.
- Initiatives taken for enhancement of mines life, water table management, restoration of spent mines, green belt development and biodiversity.

Cleaning Products

‘Cleaning Products’

Cleaning Products are substances used to remove dust, stain, offensive odor and clutter on surfaces, avoid spread of dirt and contaminants and kill bacteria. This section covers restroom cleaner, multipurpose cleaner, facade cleaners, floor cleaners etc. Green cleaning products are made of biodegradable and natural ingredients which reduce environmental impact throughout the life cycle including resource efficient manufacturing and minimal environmental impact during use and disposal.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Enhances indoor air quality and occupant health by reducing exposure to VOC's.
- Eliminates use of hazardous substances to avoid water pollution in the effluent.
- Contributes to indoor environment quality of Green Buildings.

Application

Cleaning of floor, wall, glass, sink and toilets.

Proklean Technologies Pvt. Ltd.

About Manufacturer

Proklean Technologies was born out of the passion of the founders towards green living and pollution free environment. Started in the year 2012, the founders first started with a single minded purpose of reducing pollution around them. They used a unique technology of harnessing the power of probiotic microorganisms to produce industrial and household products that replace harmful chemicals used in the industries today. The experience of the founders in the areas of biochemistry, probiotics and application research helped them quickly understand the potential of these tiny single celled organisms and soon the company was making chemical replacement products for leather, textile and hospitality industry. It further added products for the paper and pulp industry and launched its consumer products in the year 2020.

Green Product Features

- Absence of heavy metals such as Lead, Cadmium, Hexavalent Chromium.
- Products have very low Volatile Organic Compounds (VOC).
- Hazardous and toxic substances are well below limits.

Construction Blocks for External Uses

‘Construction Blocks for External Uses’

They include paver blocks, kerbs, paver tiles for external uses. Made up of post-consumer industrial waste, recycled plastic and C& D waste.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Recycling reduces the energy needed for new material production.
- Utilization of industrial waste reduces resource consumption and related environmental impacts.
- Helps in achieving Green Building rating by gaining additional credits as part of ‘Materials and Resources’ section.

Application

These construction materials find applications in non-load-bearing structures, paving, landscaping, and decorative elements in buildings and outdoor spaces, providing versatility and durability.

Companies

The following company has achieved ‘GreenPro’ certification for their products.

- Saltech Design Pvt. Ltd.
- Vyra Tiles

Note: For detailed list of GreenPro Certified products under each manufacturer, refer www.ciigreenpro.com

Saltech Design Pvt. Ltd.

About Manufacturer

Saltech is not just a startup; they are the embodiment of innovation, resilience, and a relentless commitment to progress. Construction Aggregate

‘Construction Aggregates’

Under the category of construction aggregates, low density aggregates made of fly-ash have been certified. They can be used in lieu of conventional aggregate in concrete production.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Reduces dead weight of concrete structure by approximately 20 %.
- Improves thermal insulation property to concrete.
- Reduces micro cracks thereby enhancing durability of concrete.
- Utilization of industrial waste reduces resource consumption and related environmental impacts.
- Helps in achieving Green Building rating by gaining additional credits as part of ‘Materials and Resources’ section.

Companies

The following companies have achieved ‘GreenPro’ certification for their products.

- Indian Metals & Ferro Alloys
- Sinicon Controls (P) Ltd

Indian Metals & Ferro Alloys

About Manufacturer

Established in 1961 in the Eastern State of Odisha known for its rich natural resources, IMFA is India's largest, fully integrated producer of ferro alloys with 187 MVA installed furnace capacity backed up by 261 MW captive power generation and extensive chrome ore mining tracts. They are unique from the quality perspective due to comprehensive ISO 9001 Quality Management certification besides ISO 14001 Environment Management and ISO 18001 Occupational Health & Safety certification.

Green Product Features

- High utilization of industrial waste fly-ash.
- Green procurement by utilization of fly-ash.
- Resource efficient manufacturing.

GreenPro EcoLabelled Products

Construction Blocks

‘Construction Blocks’

Construction blocks contribute significantly towards construction of energy efficient building envelopes. Green buildings demand construction blocks with better thermal performance which in turn will reduce the heat gain in the buildings by at least 3 – 5%. GreenPro helps in identifying construction blocks with very low ‘U’ value (Improved insulation) and maximum industrial waste utilization by quantity. Products such as fly-ash blocks, recycled concrete blocks, autoclaved aerated concrete blocks are certified under this category.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Enhanced thermal comfort in non-air-conditioned buildings.
- Overall reduction in weight and hence possibility of reducing steel use.
- Increased utilization of industrial waste leading to conservation of natural resources.
- Contributes for gaining credits in achieving green building certification under ‘Energy efficiency’ and ‘Material and Resources’ categories.

Application

Suited for low and high-rise buildings for wall construction. An eco-friendly substitute for clay-based bricks.

Companies

The following companies have achieved ‘GreenPro’ certification for their products.

- Biltech Building Elements Pvt. Ltd.
- Brixi Industries
- Eco Green Products Pvt. Ltd.
- Godrej & Boyce Mfg. Co. Ltd – Construction Division
- Greenbanana Environment Solutions Pvt. Ltd.
- Hella Infra Market Pvt. Ltd.
- JK Lakshmi Cement Ltd
- JVS Comatsco Industries Pvt. Ltd
- KK-FRP And Koncrete Products Pvt. Ltd.
- Magna AAC Blocks
- Maxlite AAC Blocks (India) Pvt. Ltd.
- N.J. Ecobuild Pvt. Ltd.
- NCL Buildtek Ltd
- Oriental Power Cables Ltd
- Renaatus Procon Private Limited
- Sai IGES Power Pvt. Ltd.
- Sharda Excel Pvt. Ltd.
- Shree Cement AAC Block
- Smart Brixinfra Technologies Pvt. Ltd.
- Srikar Enterprises Pvt. Ltd
- Sunvik Flyash
- TATA Tisco Build
- UAL Industries Ltd
- Ultratech Cement Limited (BPD)
- Zerund

Note: For detailed list of GreenPro Certified products under each manufacturer, refer www.ciigreenpro.com

Biltech Building Elements Pvt. Ltd.

About Manufacturer

Founded in 1993, Biltech Building Elements Limited leads the way when it comes to sustainable constructions. Proud manufacturers of durable building materials like AAC blocks and wall panels, they have also expanded business into dry-mix products and walling solutions.

In the pursuit of diversifying sustainable business practices, Biltech India launched the next generation of masonry reinforcement in India, in collaboration with Bekaert, for the very first time.

Green Product Features

- High recycled content.
- Regional procurement of raw materials.
- Resource efficient manufacturing of Blocks (AAC Blocks).
- Use of industrial waste fly ash > 70%.
- Superior thermal insulation than conventional masonry.

BriXo Industries

About Manufacturer

BriXo is professional manufacture and supplier of building products focusing on masonry related products. Headquartered in Ahmedabad, Gujarat, India, run by dedicated team of young and experience professionals. BriXo is committed to develop sustainable cost effective solution not just only products. Our state-of-the-art manufacturing plants located at Kadi Town near to Ahmedabad.

As a company, they are committed to 'build something special' guiding us Sustainability, Innovation and Quality.

Green Product Features

- High recycled content.
- Regional procurement of raw materials.
- Resource efficient manufacturing of Blocks (AAC Blocks).
- Use of industrial waste fly ash > 70%.
- Superior thermal insulation than conventional masonry.

Eco Green Products Pvt. Ltd.

About Manufacturer

Eco Green Products Pvt. Ltd. is an endeavor towards building an eco-conscious society where nature and future can grow harmoniously. Modern day construction practices take many points in to consideration. While aesthetic and strength are the prime factors.

Based at Ahmedabad, Gujarat, they are poised to revolutionize and transform the conventional construction practices with innovative and effective Eco Green Autoclaved aerated concrete (AAC) Blocks.

Green Product Features

- High recycled content.
- Regional procurement of raw materials.
- Resource efficient manufacturing of Blocks (AAC Blocks).
- Use of industrial waste fly ash > 70%.
- Superior thermal insulation than conventional masonry.

Greenbanana Environmental Solutions Pvt. Ltd.

About Manufacturer

Greenbanana Environment Solutions Private Limited is a startup setup to develop, design and distribute building materials that are made using 100% secondary material thereby addressing the challenge of exponential natural resource depletion due to construction. Their vision is to decouple infrastructure development with climate crisis and synergise infrastructure innovation with sustainability.

Green Product Features

- High recycled content with post-consumer industrial waste.
- Regional procurement of raw materials.
- Resource efficient manufacturing of Blocks (AAC Blocks).

Hella Infra Market Pvt. Ltd.

About Manufacturer

Infra.Market is a one-stop solution for all your construction material requirements. With world class manufacturing units and Innovation Center, they revolutionize construction products from foundation to finish. We provide a variety of building materials and lifestyle products that elevate interiors through our robust B2B, retail and B2C network .

Green Product Features

- It offers excellent thermal insulation properties with an overall heat transfer coefficient of 0.56 W/m² K.
- Use of regionally sourced and manufactured raw materials in manufacturing process.
- Use of renewable raw materials recycled materials in manufacturing process.

JK Lakshmi Cement Ltd

About Manufacturer

JK Lakshmi Cement Limited is a part of over 132 years old JK Organisation. An eminent industrial house, with operations in India and abroad and having a leadership presence in the fields of tyre, cement, paper, power transmissions and sealing solutions, dairy products and textiles.

It was set up in 1982– in a village in District Sirohi, Rajasthan. JK Lakshmi Cement is the strength behind structures that India is proud of – Indra Gandhi Nahar Pariyojna, Sardar Sarovar Project, Golden Quadrilateral, Mundra and Kandla Port stands to name a few.

Green Product Features

- Good thermal insulation 0.10 – 0.14 W / m-k
- Use of industrial waste flyash.
- Saves water as they do not need curing.

NCL Buildtek Ltd

About Manufacturer

NCL Buildtek Ltd is part of NCL Group and it comprises of ALLTEK & SECCOLOR divisions. Over period of time the product portfolio is expanded to AAC blocks, dry-mix mortars, tile adhesives & flooring segments.

Today, NCL Buildtek Ltd has four successful business verticals under its realm; NCL coatings, NCL windows, NCL wall solutions and NCL services. Through the coatings division, NCL manufactures putties, textures and wide range of emulsion paints. Through the windows division, NCL manufactures colour coated GI windows and over a period started manufacturing ABS doors in collaboration with South Korea, UPVC doors & windows in collaboration with Veka AG, Germany, and high-end aluminium windows in partnership with Schuco, Germany. Through the walls division, NCL manufactures AAC blocks, dry-mix cement mortars & wide range of tile adhesives.

Green Product Features

- Reduces the dead load significantly that result in less usage of steel and concrete.
- Light weight but higher compressive strength
- Offers low heat transmittance (U value: 0.95 W/ m² K) through AAC Blocks.
- Use of sustainable raw materials to the tune of 71.3%.

Renaatus Procon Private Limited

About Manufacturer

Renaatus Procon Private Limited is the leading manufacturer of Autoclaved Aerated Concrete (AAC), with five decades of experience in the construction industry and three manufacturing units across Tamil Nadu.

From their inception, they have strived to bring value to our environment in the form of green building materials which is eco-friendly and sustainable. In this new revolution, they make a long-lasting difference by focusing on water & energy efficiency, improving productivity, monetary savings, and minimum wastage. They use fossil energy wastes for making our products. They also manufacture sustainable construction chemicals.

Green Product Features

- Have a Thermal Conductivity of 0.24 W/m-k.
- Reduces the dead load significantly that result in less usage of steel and concrete.
- Fly ash usage is 60%.

Tata Tisco Build

About Manufacturer

TiscoBuild Green Construction Blocks are the best alternative to unsustainable red bricks by virtue of being manufactured from eco-friendly raw materials, their superior strength & minimal transit breakage. TiscoBuild also drastically reduces the consumption of sand and water during construction, is lightweight, and has the best-in-class thermal performance leading to reduced electricity expenses and savings on rebars. The offering also includes usage support and on-site training on installation practices, thereby making TiscoBuild a comprehensive building solution of the future.

TISCOBUILD

UAL Industries

About Manufacturer

As one of India's leading construction material manufacturing company, UAL Industries Ltd. has, over the last three decades been meeting and fulfilling rural India's demand as the most ideal roofing solution for low-cost housing materials. UAL as an organization believes that 'Dynamism and innovation are prerequisites today to not to just build but to sustain in the future'.

Environmental sustainability is ingrained in UAL's endeavours and perhaps it is this idea which has led to the formation of KON_CRETE with a state of the art manufacturing unit for manufacture of Autoclave Aerated Concrete (AAC) blocks and panels.

Green Product Features

- High thermal resistance and thermal mass helps to maintain temperature, reducing usage of heating and cooling equipment.
- Saves about 25% of the cost of installation and recurring costs of electricity.
- Water and pest resistant.
- Blocks and panels are lightweight with high dimensional accuracy and easy workability.
- Blocks are extremely strong and durable despite being lightweight, ensuring that the foundations of a building are lightly loaded.
- Blocks provide excellent sound absorption with a Sound Transmission Class rating of 44.

Construction Chemicals

‘Construction Chemicals’

There are a variety of construction chemicals such as admixtures, sealants, grouts, protective coatings, water proofing chemicals, adhesives, ready mix plaster etc. are used in construction of buildings. These chemicals affect the indoor environment quality and make significant impact on health and well-being of occupants. There is a need for choosing the right construction chemicals without hazardous substances and volatile organic compounds.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Complies with restrictions on Hazardous Substances (RoHS) requirements.
- Very low/No VOC content and hence improves the indoor air quality.
- Enables award of credit in Green Building certification as part of ‘Materials and Resources’ and ‘Health and Well-being’ categories.

Application

Block jointing mortar, adhesion for blocks, tiles, panels etc., admixtures for concrete making, waterproofing applications.

Companies

The following companies have achieved ‘GreenPro’ certification for their products.

- Evershine Build India Pvt. Ltd.
- Godrej & Boyce Mfg. Co. Ltd - Construction Division

Hindcon Chemicals Limited

About Manufacturer

HINDCON CHEMICALS LTD. (Formerly known as Hind Silicates Pvt. Ltd..) was formed in 2000, its chemical production roots date back to as early as 1947, with its parent company Hind Chemicals producing Sodium Silicate with in installed capacity of 1800 MT per Annum from its Dum Dum plant. As it now stands, the Hind Silicates factory at Jalan Industrial Complex is equipped with production capacity of 25000 MT per Annum, not to mention that more than 6 decades of concrete experience in the field. A full fledged laboratory conforming to the respective I.S. Standards has been set up, enabling the issue of Test Certificates as and when necessary. An active R&D wing enables a continuous product update, bringing the customers the highest grade of Sodium Silicate and its variants in the region. An environmentally friendly Company, Hindcon Chemicals take great care in preserving the surrounding by adopting environmentally safe methods of production.

Green Product Features

- Very low VOC content.
- Free from hazardous and toxic substances.
- Regional green procurement.

Marmo Solutions Pvt. Ltd.

About Manufacturer

Incorporated in the year 2013, in New Delhi, (Delhi, India), "Marmo Solutions Pvt. Ltd.", are the emerging supplier of Sealer & Protector, Densifiers & Guards, Hardener Paste, Crystallizers & Shiners, Cleaners & Shiners, Laminates & Guards, Protection & Guards, Densifiers & Fillers, Stone Solution Product, Marmotape- WD, Stain Remover, Limestone & Marble Tape and Fillers & Grouts.

The offered products are widely appreciated among the clients for their stability, long shelf life, purity, accurate pH value and effectiveness. They source raw materials from trusted and reliable vendors of the market. These products are precisely processed in sync with international quality norms using premium quality chemical compounds and innovative techniques.

Green Product Features

- Low Volatile Organic Compounds (VOC) emissions.
- Reduced flammability due to high flash point.
- Local sourcing of raw materials.
- Restriction of prohibited substances such as heavy metals.

Pidilite Industries Ltd.

About Manufacturer

Since inception, their growth has been strongly linked with that of our nation. In today's world, sustainable development is an imperative for all businesses. At Pidilite, they comprehend the impact of business on the environment and the society at large and strive to make sustainability an integral part of our actions.

They consider environmental management as a material topic and are committed towards minimizing our environmental footprint by thoughtful use of resources such as fuel, electricity, water and raw materials.

Green Product Features

- Reduced flammability due to high flash point.
- VOC content is negligible.
- Restriction of prohibited substances such as heavy metals.

GreenPro EcoLabelled Products

- Fevicol Probond
- Fevicol Hiper Star
- Fevicol SWR
- Fevicol Relam
- Fevicol Plastilok
- Fevicol Nail Free Ultra
- Roff Block Line Mortar
- Roff Bond Repair
- Roff Rainbow Tile Mate
- Roff Cera Clean
- Fevicol SR 505 HVAC
- Fevicol SR 998 HVAC
- Fevicol AC Duct King Lag Coating
- Fevicol AC Duct King Optima
- Fevicol AC Prefab - 30 Ltr
- Fevicol AC Duct King Eco Fresh
- Fevicol Weather Protekt Coat
- Fevicol Heatx

Precise Conchem Pvt. Ltd.

About Manufacturer

Precise Conchem Pvt. Ltd. - a Mumbai-based ISO certified company - began its journey in 2005 to offer quality solutions for challenges faced by the building construction industries; predominantly cracks, de-bonding of plasters and water leakages & seepages.

Green Product Features

- Need less water for curing.
- VOC content is negligible.
- Restriction of prohibited substances such as heavy metals.
- Reduces water absorption.

GreenPro EcoLabelled Products

- Silico Bond – Polymer
- Silico Con – Dry mix Concrete
- Silico Crete Polymerized RCC Repair Mortar
- Silico Crete – Tie Rod Grout
- Silico Fix – Block Joining Mortar
- Silico Fix Masonry Mortar M10
- Silico Flow – Non-Shrink Micro-Concrete
- Silico Plast – Polymerised Dry Mix Plaster
- Silico Tile Fix – Tile Adhesive

Renaatus Procon Pvt. Ltd.

About Manufacturer

Renaatus Procon Private Limited is the leading manufacturer of Autoclaved Aerated Concrete (AAC) blocks and Construction chemicals such as Tile Adhesives, Grouts with five decades of experience in the construction industry and three manufacturing units across Tamil Nadu.

From their inception, they have strived to bring value to our environment in the form of green building materials which is eco-friendly and sustainable. In this new revolution, they make a long-lasting difference by focusing on water & energy efficiency, improving productivity, monetary savings, and minimum wastage. They use fossil energy wastes for making our products.

Green Product Features

- Made of single component.
- 80% of raw materials are sourced regionally.
- VOC content is within threshold.

Signum Fire Protection India Pvt. Ltd.

About Manufacturer

SIGNUM has established itself as the leader in Passive Fire Protection in the Indian sub-continent. With constant in-house R & D, they have increased their product base to include acoustic doors and partitions, hermetically sealed doors, fire protective storage systems and fire protective rolling shutters, hangar doors and sliding doors besides fire proof steel and timber doors. They also manufacture fire protective coatings.

Green Product Features

- Free from Asbestos.
- VOC content is within threshold.
- Can withstand high temperatures for 60-240 minutes.

GreenPro EcoLabelled Products

- Fire Stop Compound
- Fire Retardant Cable Coating
- Fire Eliminator
- Fire Protective Coal Coating
- Fire Retardant Paint

Thermax Limited – Chemical Division.

About Manufacturer

Thermax Group is a company headquartered in Pune, India. Its business portfolio includes products for heating, cooling, water and waste management, and specialty chemicals. The systems, products and services developed by Thermax help industry achieve better resource productivity and improve bottom lines, while maintaining a cleaner environment

Green Product Features

- VOC content is less than 0.1%.
- 90% of regional materials are used.
- Non-Flammable.
- Phosphate Free

GreenPro EcoLabelled Products

- Maxtreat 7800 (Mxt 7800 TR)
- Seismocrete
- BS 66 Mucis

Protect the environment with phosphate-free chemical

INTRODUCING
Maxtreat® 7800 TR

Zero Phosphate Based
Corrosion and Scale Inhibitor
for Cooling Systems

- Phosphate-free product
- Offering with automated dosing and monitoring system
- Cost effective treatment
- Water savings with higher COC
- Reduction in ETP operating cost
- Helps in meeting ETP discharge norms

UltraTech Cement Limited- Building Products Division

About Manufacturer

In the endeavour to provide complete sustainable solutions to customers and to be 360 Degree building material destination, UltraTech Cement has established UltraTech Building Products Division. UltraTech Building Products division manufactures and markets technologically re-engineered products for construction and infrastructure industry.

Today the construction industry is demanding products which can replace conventional products as well as conventional methodology for fast track constructions. To meet this challenging demand, it offers a complete portfolio of end-to-end solutions, covering the entire spectrum of construction.

Green Product Features

- Construction chemicals have low volatile organic compounds.
- Use of sustainable raw materials.
- Arsenic and Mercury free products.
- Reduction in hazardous and non-hazardous waste disposal to landfill.

GreenPro EcoLabelled Products

- UltraTech WEATHER PRO HI-FLEX
- UltraTech WEATHER PRO FLEX
- UltraTech TileFixo

Consumer Products

‘Consumer Products’

Consumer products refer to the set of products that are part of daily life of the end user, which unlike building products are not fixated. These products are an integral part of our life with the use being a mix of single time consumable with a repetitive need and reusable product.

GreenPro enables the end users to choose consumer products which are more eco-friendly and have less negative impact on the environment. It also ensures that these consumer products are free from hazardous substances and any other health hazards.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Increased sustainable product usage in daily life of end user.
- Lesser impact on environment due to volume usage.

Companies

The following company has achieved ‘GreenPro’ certification for their products.

- Hindalco Industries Ltd.
- ITC Limited, Packaging & Printing Business.
- Sri Kannapiran Mills Ltd.
- Pearl Polyfilm Manufacturers
- Pal Fashions

Note: For detailed list of GreenPro Certified products under each manufacturer, refer www.ciigreenpro.com

Hindalco Industries Ltd.

About Manufacturer

Hindalco is India's premier foil and foil laminates supplier in different variants – plain, laminated, lacquered and printed which are used for various packaging applications. Hindalco has a modern and well-equipped facility at Mouda near Nagpur in Maharashtra. The state-of-the-art foil rolling facility incorporates the latest technology and offers a wide range of quality foils upto a thickness of 6 micron.

Green Product Features

- 100% Aluminium Scrap.
- 100 % local procurement of raw materials within 100 km.

GreenPro EcoLabelled Products

- Aluminum Alloy Bare Foil for Food Packaging

Pearl Polyfilm Manufacturers

About Manufacturer

inaugurated in the year of 2008, "Pearl Poly Film Manufacturers" established as a prominent organization of the market by wholesaling and trading a wide array of Garbage Bag Products. Under the quality approved collection of products they are presenting Garbage Bags, Biodegradable Garbage Bags and Flat Garbage Bag. Offered products are manufactured from high-grade input factors with following industry norms and standards.

Green Product Features

- 5 % recycled content
- Starch and PLA based polymer.
- Biodegradation Percentage of 93% after 12 weeks.

GreenPro EcoLabelled Products

- Pearl Compostable Bio-degradable Garbage Bags
- Pearl Compostable Bio-degradable Grocery Bags
- Pearl Compostable Bio-degradable Bio-Medical/Non-Chlorinated/Autoclavable disposable bags

Cooling Towers

‘Cooling Tower’

Cooling towers find their application in HVAC systems for cooling applications in both commercial and residential settings. The capacity of the cooling tower will vary depending on the cooling load requirement. Cooling towers can be resource intensive in terms of energy and water usage requirements. GreenPro enables the end users to choose cooling towers which are manufactured resource efficiently and are less energy and water intensive.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Energy efficient
- Water efficient
- Effective heat rejection

Companies

The following company has achieved ‘GreenPro’ certification for their products.

- Advance Cooling Tower

Advance Cooling Tower

About Manufacturer

Advance Cooling Towers Private Limited is a leading FRP cooling tower manufacturer in India and an exporter of cooling towers. They are a well known name for our premium quality and highly efficient product range. We have an extensive network of our service team enabling us to provide prompt and timely solutions to any issue, minimising customer's down time.

Green Product Features

- High approach TM Cooling Tower with multiple existing installations of approach $\leq 1.5^{\circ}\text{C}$.
- High Specific Flow (>350 LPM/kW).
- Use of sustainable materials to the tune of 14%.
- Highly efficient drift eliminators limiting the drift loss to 0.0005%.

GreenPro EcoLabelled Products

- Induced draft counter flow cooling towers
- Induced draft counter flow cooling towers with EC fans
- Induced draft cross flow cooling towers
- Induced draft cross flow cooling towers with EC fans

ADVANCE 20 20™

Copper Tubes

‘Copper Tubes’

Copper tubes are a key component in green buildings and environmentally friendly construction due to their durability, high thermal conductivity, and recyclability. These tubes are favored for their energy efficiency, ensuring efficient heating and cooling systems, ultimately reducing energy consumption and greenhouse gas emissions. Additionally, copper is fully recyclable, contributing to sustainability goals by minimizing resource depletion and waste. Copper tubes are used in environmentally friendly construction methods that have an emphasis on durability, energy efficiency, and resource management.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Copper tubes efficiently transfer heat in HVAC and plumbing systems, reducing energy usage and supporting green building's energy efficiency goals.
- Improved resistance to cracks and corrosion resulting in improved durability.
- Increased use of recycled content and hence reduced virgin material consumption.

Application

Copper tubes in green buildings are suitable for plumbing, heating, cooling, renewable energy, rainwater harvesting, fire safety, and architectural elements, supporting energy efficiency and sustainability.

Companies

The following companies have achieved ‘GreenPro’ certification for their products.

- Kwalita Tubes & Capillaries
- Mercure Metals and Alloys Pvt. Ltd.
- Rajco Metal Industries Pvt. Ltd.

KWALITY Tubes & Capillaries

About Manufacturer

KWALITY Tubes is an EIL Approved Stockholder and their distribution operations all across globe. It is the leading supplier/stockholder : Stainless Steel, Carbon Steel, Alloy Steel, Nickel Alloys, Duplex, Super duplex and other Ferrous & Non-Ferrous Metal products such as Pipes, Tubes And Pipe Fittings.

Green Product Features

- Contains 25% of recycled copper.
- Absence off Cadmium, Lead, Mercury, Hexavalent chromium, Polybrominated biphenyls (PBBs), Polybrominated diphenyl ethers (PBDEs).

GreenPro EcoLabelled Products

- Copper Tube for AC
- Copper Tube for Refrigeration
- Copper Tube for Medical Grade
- Copper Tube for Plumbing

Doors & Windows

‘Doors & Windows’

Doors and windows in a building, apart from their functional requirements, contribute significantly for heat gain. The heat gain is very significant if they are made of metals. Green Buildings demand for doors and windows with lower thermal conductivity. Green Buildings also encourage materials with high recycled content and in the case of wooden products that are responsibly sourced. The coatings/paints used in these metal/wooden doors need to be with very low volatile organic compounds.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Improved thermal performance with overall heat transfer coefficients ranging from 1 to 3 W/m²k.
- Increased use of recycled content and hence reduced virgin material consumption
- Very low VOC emissions and hence improved Indoor Air Quality.
- Contributes towards gaining credits related to energy efficiency, Indoor Air Quality, Materials and Resources categories of Green Building Rating.

Application

Suitable for all building typologies.

Companies

The following companies have achieved ‘GreenPro’ certification for their products.

NCL Buildtek Ltd.

About Manufacturer

NCL Buildtek Ltd is part of NCL Group and it comprises of ALLTEK & SECCOLOR divisions. Over period of time the product portfolio is expanded to AAC blocks, dry-mix mortars, tile adhesives & flooring segments. Today, NCL Buildtek Ltd has four successful business verticals under its realm; NCL coatings, NCL windows, NCL wall solutions and NCL services. Through the coatings division, NCL manufactures putties, textures and wide range of emulsion paints. Through the windows division, NCL manufactures colour coated GI windows and over a period started manufacturing ABS doors in collaboration with South Korea, and high-end aluminium windows in partnership with Schuco, Germany.

Green Product Features

- It emits low air contaminants such as TVOC, 4-Phenylcyclohexene, Total Aldehydes etc.
- Utilize GreenPro certified Glass.
- Moisture and termite resistant tubular particle board.
- Overall heat transfer coefficient $2.85 \text{ W/m}^2 \text{ K}$

Soundarya Decorators Private Limited

About Manufacturer

Soundarya Interiors has the in-house capabilities to execute large-scale interior projects, against efficient timelines, and with minimal work carried out at the project site. They have pioneered the craft of interior solutions and deliver these to some of the most well-known brands globally. At Soundarya, we know what it means to live in harmony with the environment that provides them with the raw material that makes everything we do possible. From replanting to better sewage management, thoughtful construction, and beyond, here are a few of their sustainability initiatives. Much like their belief in their work, they also know that their commitment to sustainability is only going to grow with time.

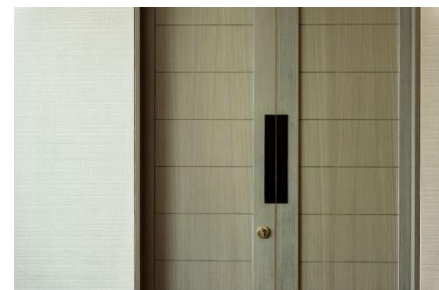

Green Product Features

- It emits low air contaminants such as TVOC, 4-Phenylcyclohexene, Total Aldehydes etc.
- Use of FSC certified tubular particle boards.
- Moisture and termite resistant tubular particle board.
- Use of phenol formaldehyde synthetic resin.

Furniture

‘Furniture’

Green buildings demand for use of ergonomically designed furniture with very low emissions. Ergonomically designed furniture enhances the health and well-being of the users. The emissions from the furniture are on account of paints, adhesives, foams and coating materials. Products such as wood and non-wood-based furniture are covered under this category.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Low concentrations of air contaminants such as formaldehyde, TVOC, total aldehydes and 4-phenylcyclohexene and hence improved indoor air quality.
- Ergonomically designed and hence enhanced occupant comfort.
- Utilizes legally sourced wood and recycled/recyclable materials contributing lower environmental impacts.
- Contributes to Materials and Resources, Indoor environment quality and Occupant comfort credits of Green Building certification.

Application

Suitable for interior spaces of all building typologies such as office, home, hotel, healthcare etc.

Companies

The following companies have achieved ‘GreenPro’ certification for their products.

Ground Granulated Blast Furnace Slag

‘Ground Granulated Blast Furnace Slag’

Ground Granulated Blast Furnace Slag (GGBS) is a by-product of iron and steel manufacturing process. It is produced by quenching molten iron slag from a blast furnace which is, then, ground into fine powder. The granulated blast furnace can be used as an additive in ordinary Portland cement to produce slag cement and concrete. It can replace cement to the extent of 70% by weight. GGBS enables the concrete to gain strength over a period of time and offers excellent resistance to corrosion.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- It is a product derived from post-industrial waste of iron and steel manufacturing process.
- Concrete with GGBS has a higher strength than concrete made of Portland Cement
- It reduces Ordinary Portland Cement (OPC) requirement in concrete making.
- It contributes to materials with recycled content credit of Green Building certification.

Application

Supplementary cementitious materials in manufacturing of Concrete, Concrete Blocks, Portland Pozzolana Cement and Portland Slag Cement.

Companies

The following companies have achieved ‘GreenPro’ certification for their products.

- JSW Cement Limited
- Sagar Cements Ltd
- Supreme Microfines Pvt. Ltd. – Ecofines
- Tata Steel Limited - GGBS

Note: For detailed list of GreenPro Certified products under each manufacturer, refer www.ciigreenpro.com

JSW Cement Limited

About Manufacturer

Since its inception in 2009, JSW Cement entered the market with a vision to ensure a sustainable future for the country by producing eco-friendly cement. JSW Cement utilizes slag from the JSW Steel plants to produce green cement. JSW Cement's flagship plant in Nandyal uses world-class technology (including the advanced Combi Finish Mode Roller Press Circuit and automated loading system) to manufacture cement. It also won prestigious awards for its energy-saving processes. With key markets in Telangana, Andhra Pradesh, Karnataka, Tamil Nadu, Kerala, Maharashtra, Orissa, and Goa, JSW Cement has been delivering high-quality products to several prestigious and large infrastructural projects in the southern and western regions of the country.

Green Product Features

- Replaces more than 60% of cement in Portland Slag Cement.
- Reduces cement consumption in concrete.
- Resource efficient manufacturing process.

Supreme Microfines Pvt. Ltd. - Ecofines

About Manufacturer

Ecofines is a subsidiary of SupremeMicrofines Pvt. Ltd.. Ecofines vision is to create environment-friendly infrastructure and build an economy where humanity and nature coexist in the times of intense climate crisis. The climate crisis is palpable. Ethical and radical pressure to decarbonize continues to curtail the increasing greenhouse effect.

Green Product Features

- As a by-product of the iron-making process, using GGBS reduces the need for extracting raw materials for cement, making it an environmentally friendly option.
- Use of biomass in the manufacturing process.

Tata Steel Limited – GGBS Division

About Manufacturer

Tata Steel is currently the world's second-most geographically diversified steel producer. They are one of the few steel operations that are fully integrated – from mining to the manufacturing and marketing of products.

Continuous improvement in product and service portfolio, along with success in value creating initiatives for customers, allows Tata Steel to serve global markets. Today, they operate in 26 countries and have a commercial presence in over 50 countries with employees across five continents.

Green Product Features

- As Concrete made by using GGBS is stronger, more durable.
- Higher ultimate strength, low permeability, resistance to chloride and sulphite attacks
- Can be used as a partial replacement of Ordinary Portland Cement (OPC)

Health & Wellbeing Products

‘Health and wellbeing products’

Green Buildings contribute significantly for enhancing occupants’ comfort, health and well-being. Indoor air quality is one of the vital parameters for improving the health and well-being. Poor air quality in a building can lead to headache, nausea, eye irritation, vomiting which are called as side building syndrome for the occupants. GreenPro enables the end users to choose health and wellbeing products and technologies which contribute towards enhancing the indoor air quality.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Better indoor air quality to enhance wellbeing of occupants by limiting contaminants such as particulate matter, microbial count etc.
- Use of IAQ solutions in buildings can lead to award of credits towards ‘Indoor Environmental Quality’ aspect in green building ratings.

Application

HVAC systems and Indoor environmental Quality related applications

Companies

The following companies have achieved ‘GreenPro’ certification for their products.

- Aliferous Technologies Pvt. Ltd (Clairco)
- Aura Air Private Limited
- Bonphul Air Products
- Camfil India Private Limited
- Magneto Cleantech

Note: For detailed list of GreenPro Certified products under each manufacturer, refer www.ciigreenpro.com

Aliferous Technologies Pvt. Ltd (Clairco)

About Manufacturer

Aliferaous Technologies Private Limited (Clairco) is an IAQ solutions provider based out of Bangalore. Clairco designs and manufactures IAQ products which are energy-efficient. They have patented their technology for low-pressure drop and efficient preventive maintenance. They use pleated combination filters for filtration applications and monitoring parameters like CO₂ and VOC's in real-time.

The monitoring system is REACH and CE certified meeting all the compliance criteria. Retrofitting of AHU's and Fresh Air Louvers is possible with the filters in a customized frame design for meeting MERV 13 grade performance. Fresh Air Systems with Fans and automated sensor-based controllers are installed to reduce the CO₂ levels and maintain positive indoor air pressure for maintaining clean air at all times.

Green Product Features

- Free from hazardous and toxic substances.
- Use of Recycled content.
- Use of Low VOC coatings.
- Enhanced Acoustical performance.

Aura Air Private Limited

About Manufacturer

Aura Air created the world's smartest data-driven air purification system, one that cleanses indoor air while vigilantly monitoring its quality in real-time. Aura Air's award-winning and patented technology filters and disinfects indoor air through a unique four-stage purification process. Founded in 2018, Aura Air is now purifying the air in homes, hospitals, schools, businesses, hotels, restaurants, buses, and nursing homes in more than 50 countries around the world. Aura is headquartered in Israel with global offices in the US and India.

Green Product Features

- ABS (Acrylonitrile Butadiene Styrene) plastic is used to ensure that the parts in the future are recyclable, durable with higher service life and easy moldability.
- Fiber Glass filter is used in the products, to ensure that the filters are recyclable and contribute to circular economy.

Bonphul Air Products

About Manufacturer

Bonphul Air Products aims to be a comprehensive global industrial-gases company with expertise in oxygen, nitrogen, carbon dioxide, hydrogen and other specialty gases.

The 21st century would present a unique set of challenges to the industrial-gases business. As incomes rise—and access to quality healthcare becomes affordable—there would be demand for medical-gases. As the globe warms up and the chorus for carbon-neutrality increases, there would be a need for carbon capture & storage (CCS) solutions. As the economy transitions from a fossil-fuel regime to a renewable-energy one, there would be a requirement for energy-storage; and what better candidate than green-hydrogen.

Green Product Features

- Enhancing indoor air quality (IAQ) through increasing oxygen level.
- Works on the pressure swing adsorption technology.
- Oxygen with purity of 70 of 85% is Supplied to occupied space.

GreenPro EcoLabelled Products

- OxyMax 10 LPM

Camfil India Private Limited

About Manufacturer

Camfil APC is a division of Camfil, headquartered in Stockholm, Sweden, and is a worldwide air filtration company. Camfil has filtration divisions that specialize in HVAC filters, HEPA filters, cleanrooms, gas turbine intake filtration, hospital filtration and carbon odor filters. With offices and factories in practically every region of the world, Camfil can take care of any air filtration needs.

Camfil APC's goal is to be green, starting with the environmental benefits of the products. They help customers go green by stopping thousands of different pollutants from entering the workspace air from the outside environment. They build their equipment to last, so less waste is created over time. They use an environmentally friendly powder painting process so no VOCs are emitted.

Green Product Features

- Reduces efficiently air contaminants such as PM 2.5.
- Enhances occupant wellbeing, health and safety.
- Can be used for pre-filtration, air conditioning, housing ducts, diffuser applications.

Magneto Cleantech

About Manufacturer

Magneto Cleantech invents and popularizes technologies to tackle the problem of poor indoor air quality in developing nations. They focus on making clean air accessible to everyone, whether in homes, offices or buildings. By pushing the limits of engineering, they are able to build the highest quality of products that exhibit extraordinary performance. They have successfully commercialized a proprietary way of purifying the indoor air that is fundamentally superior to current methods – a central air cleaning- based system for large spaces that integrates with new or existing air conditioning equipment. They have built a diverse range of air purification products based on this patent pending technology for dust (PM 2.5) and infection control. Magneto Central Air Cleaner is one such manifestation of unparalleled air purification performance. This certified healthy air system has been meticulously engineered to protect people and their assets.

Green Product Features

- Reduces PM 2.5, and indoor air contaminants efficiently.
- Enhances occupant wellbeing, health and safety.
- Offers minimum pressure drop.
- Electrocutates filtered microbes.

High Performance Glass

‘High Performance Glass’

In a building, glazing increases the natural lighting. At the same time, it also increases the heat gain which in turn increases the energy consumption in air-conditioning system. There is a need for balancing these both. Use of high-performance glass for the fenestration helps in reducing the heat gain significantly and increasing the natural lighting.

GreenPro enables the end users to choose glass with credible performance parameters such as ‘U’ value, solar heat gain coefficient and visual light transmittance suitable for green building requirements.

GreenPro EcoLabelled Product Categories also meets the requirements of Energy Conservation Building Codes (ECBC) for glazing.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Increases the natural lighting and reduces artificial lighting energy consumption.
- Reduces the heat load and leads to reduction in energy consumption of air-conditioning system.
- Reduces the capacity requirement of air-conditioning and hence the related capital cost.
- Contributes to enhancement of energy efficiency of the building and achieve Green Building certification.

Application

External facades, shade and all other architectural glazing requirements.

Companies

The following companies have achieved ‘GreenPro’ certification for their products.

- Asahi India Glass Limited
- Gujarat Guardian
- Saint-Gobain India Private Limited

Note: For detailed list of GreenPro Certified products under each manufacturer, refer www.ciigreenpro.com

Asahi India Glass Ltd.

About Manufacturer

Asahi India Glass Ltd (AIS) is India's leading integrated glass and window solutions company and a dominant player both in the automotive and the building & construction segments. Their product solutions spanning the entire breadth of automotive, building & construction, and consumer glass, are designed to deliver aesthetics and functional benefits. Another for tempered glass for 1 million cars.

We provide complete glass solutions, that include aesthetic, safety & security, energy efficiency, acoustic, privacy, and doors & windows

Green Product Features

- Majority of the products have VLT/SHGC > 1.
- Reduced heat transmittance.
- Enhanced visible light transmittance.

Eco 365 Pvt. Ltd.

About Manufacturer

Eco 365 innovate & manufacture as per clients requirement. Eco 365 has a production capacity of 1800 metric ton annually, 25000 sq.foot production space dedicated only for compostable bio-plastic.

Their products are approved by CPCB as per IS 17088 standard of composting defined in Solid Waste Management Rule of 2016 by the Government of India. It is equivalent to EN13432/ASTM D6400 International standards of composting.

Green Product Features

- Made from plant extracts & 100% plastic free.
- Compostable within 60-180 days.
- Carrying Capacity ranges from few grams to 5 kg as per the functionality.

GreenPro EcoLabelled Products

- ECO365 Compostable Bags for Packaging & Waste Management

Eden Innovations

About Manufacturer

Eco Eden Innovations is an innovative technology company, is creating a revolution through sustained pollution control by offering a number of innovative solutions. Their OptiBlend solution allows conventional diesel engine to run on natural gas as its primary fuel without modifying the engine or the current diesel fuel system. This results in lower fuel costs, lower emissions, and increased runtime.

Green Product Features

- Made Natural Gas fuel substitution For DG sets.
- Fuel substitution up to 70 %
- A retrofit solution without major modifications
- PM emissions below 150 mg/m³

Emerson Commercial & Residential Solutions

About Manufacturer

Emerson strive for excellence, offering innovative and reliable solutions to keep businesses running flawlessly. They aspire to improve human comfort and health with ever constant advancement of their energy-efficient HVACR systems. They aim to solve the toughest industry challenges with our state-of-the-art compressors, condensers, heat exchanges and related products.

Green Product Features

- Energy efficient technology for hot water generation.
- It can be used in domestic and commercial applications.
- High energy efficiency with COP 3.5.

Ekam Eco Solutions Pvt. Ltd.

About Manufacturer

Ekam Eco Solutions is a team of sustainability experts and product designers passionate to build a cleaner and healthier world. They offer a range of organic cleaning solutions without the use of harmful chemicals. Ekam Eco Solutions, founded in 2013, is a research spinoff of IIT Delhi's works on Sanitation. Over five thousand man-hours of research on Sanitation forms the backbone of this organization. Ekam is a Sanskrit word meaning Oneness and Interconnectedness. Ekam's approach is based on the fundamental principles of Happiness, Simplicity and Positivity.

Green Product Features

- Can save up to 45,000 gallons of water per urinal per year compared to traditional urinals that use up to 3 gallons of water per flush.
- Eliminate the need for standing water in the bowl, which can reduce the growth of bacteria and odor.

GreenPro EcoLabelled Products

- Zerodor Waterless urinal kit

Enviroconnect

About Manufacturer

Established in 2017 with a vision to be leader & pioneer organization offering innovative environmental technologies. Enviroconnect was formulated out of R.B Concretes, which continues to provides its services through implementation of various environmental technologies such as Sewerage Treatment Plants, Effluent Treatment Plants, Rain water harvesting systems and water conservation structures and solid waste management technologies. Enviroconnect has emerged out to be a professional rain water harvesting company where they use time tested methods for planning, designing and implementation of Rain Water Conservation Solutions both for storage and ground water recharge.

Green Product Features

- The fixtures can be re-used and re-installed as per requirement.
- The product can be stacked and therefore be transported to remote places with the most primitive facilities.

Filfab Corporation

About Manufacturer

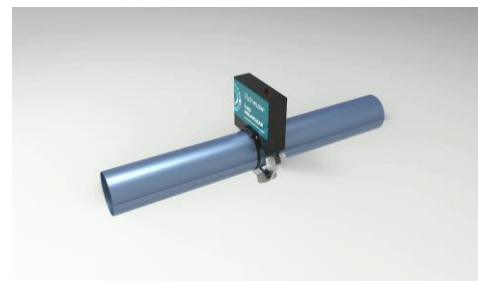

Filfab Corporation is professionally managed company focused on marketing innovative and critical products. We are the exclusive sales partners in India for M/s STERIS CORPORATION, USA and HYDROPATH TECHNOLOGY, UK who are well known world over as manufacturers of very innovative and technologically superior products.

Green Product Features

- 85% blow down(discharge) water reduction, which greatly exceeded the 50% goal.
- 75% chemical reduction.
- 50% reduction in maintenance frequency.
- 10% reduction in energy consumption by the cooling towers and chillers.

GreenPro EcoLabelled Products

Nanospan India Pvt. Ltd.

About Manufacturer

Nanospan India Pvt. Ltd. has developed a range of products which work on improvement of the Concrete. The products work on graphene-based technology developed in-house by the R&D team of Nanospan. Nanospan innovates in Disruptive, Decarbonizing material technologies aimed at sustainable living, for Construction Technology.

Nanospan's vision is to follow towards the sustainability practices in the manufacturing of products as well as to reduce carbon emissions and improve sustainability to the projects in which the products are used. Nanospan's key focus area is innovation and has been pursuing the green vision to develop products that are environmentally sustainable.

Green Product Features

- Saves 20 to 35% of Water consumption as a Water reducer.
- Manufacturing process is designed to avoid the use of toxic chemicals and solvents.

Perfect Infraengineers Ltd

About Manufacturer

Their company is committed to creating a sustainable future through the manufacture of Hybrid Thermal Solar Panels for air-conditioners. Their vision is a future where clean and renewable energy is accessible to all, where the air we breathe is cleaner, and where the environment is protected for future generations.

The system harnesses the sun's energy by reflecting the light on parabolic mirrored concentrators. The light is focused on a copper pipe that is coated with specialized absorption paint. This concentrated parabolic array allows for a larger harvesting of energy with a smaller footprint.

Green Product Features

- Can save approximately 7 metric tons of CO₂ eq per year per HTS Panel.
- The HTS Panel takes ~32 sq ft of space saving ~3,500 watts.

GreenPro EcoLabelled Products

- Hybrid Thermal Solar Panel

Insulation

‘Insulation’

In a building, walls and roofs contribute to significant heat gain which in turn leads to increase in air-conditioning requirement and related energy consumption. The heat gain through walls and roofs can be reduced by providing insulation. There are a variety of insulation materials available in the market with a wide range of insulating properties.

Thermal conductivity of the insulating material is very critical for reducing the heat load. These materials should also be fire resistant. GreenPro enables the end-user to choose insulation materials with low thermal conductivity ranging from 0.03 – 0.04 W/mk.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Reduces the heat gain in a building and hence energy consumption in air-conditioning.
- Free from prohibited flame retardants and hazardous substances
- Reduces the material consumption through increased utilization of recycled content.
- Contributes to enhanced energy efficiency and helps in achieving green building rating.

Application

Suitable for building envelope (walls and roof) and HVAC system.

Companies

The following companies have achieved ‘GreenPro’ certification for their products.

- Aerolam Insulations Pvt. Ltd.
- Asawa Insulation Pvt. Ltd.
- Berger Paints India Limited-ETICS Division
- Hi-Tec Rockfiber Pvt. Ltd.
- Natural Insulation Co. Ltd
- Rockwool India Private Limited
- ROXUL ROCKWOOL Insulation India Pvt. Ltd.
- Shreeram Equitech Pvt. Ltd.
- Star Comfort Industries
- Supreme Industries Ltd
- Supreme PetroChem
- Times Fiberfill
- U.P Twiga Fiberglass Limited

Note: For detailed list of GreenPro Certified products under each manufacturer, refer www.ciigreenpro.com

Aerolam Insulations Pvt. Ltd.

About Manufacturer

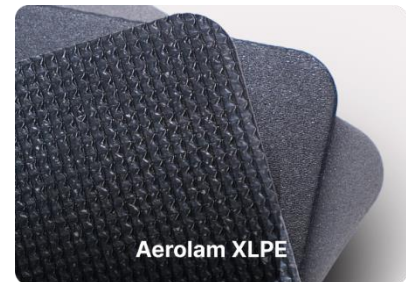

Established in 2011, they are a trusted and reliable partner to many industries, dedicated to providing products that are durable, long-lasting, and made from sustainable materials. As a leading manufacturer of insulation and packaging solutions, they contribute to a more sustainable and energy-efficient world.

Green Product Features

- Negligible Water/ Moisture Absorption
- Excellent Thermal & Acoustic Insulation
- Resistance to Fungi
- CFC and HCFC Free
- Retrofit solutions for commercial, residential and industrial use.

Laminates

‘Laminates’

Laminates are essential in green buildings for their eco-friendly attributes. They often feature sustainable materials and low VOC (volatile organic compound) adhesives, promoting indoor air quality. Laminates contribute to green construction by minimizing resource consumption, enhancing durability, and offering versatile design options for flooring, furniture, and interior finishes. Their use aligns with environmental responsibility and sustainability goals in green building practices.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Very low VOC (or) Near zero VOC leads to improvement in Indoor Air Quality.
- Improves the occupant’s health and well-being.
- Helps in achieving green building rating by contributing to indoor air quality.

Application

- Suitable Interior painting.
- Exterior applications.
- Heat reflective coatings.
- Building surface protection.

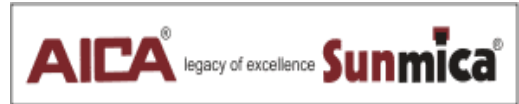

Companies

The following companies have achieved ‘GreenPro’ certification for their products.

- AICA Laminates India Pvt. Ltd.
- Archidply Industries Ltd
- Century Plyboards (I) Limited
- Euro Décor Pvt. Ltd.
- Greenlam Industries Limited
- Samrat Ply
- Vidya Lamtech LLP

Note: For detailed list of GreenPro Certified products under each manufacturer, refer www.ciigreenpro.com

AICA Laminates India Pvt. Ltd.

About Manufacturer

AICA Laminates India Pvt. Limited has completed over ten years of operations in India ever since its establishment in the year 2011. Today it is the only Japanese company in India, manufacturing high pressure and industrial laminates.

The company has its manufacturing unit at Rudrapur, Uttarakhand which is truly world class where all its products are manufactured to the most stringent international standards in tune to its eco-friendly policy of green products. It also has its own R&D centre striving for continuous upgradation of technology as per the Japanese Kaizen & 5s principles. Its endeavour has been to bring out a combination of environment and design oriented operations.

Green Product Features

- Absence of heavy metals such as Lead, Cadmium, Hexavalent Chromium as raw materials.
- Absence of VOC and low amounts of formaldehyde and aldehyde.
- Use of renewable raw materials and recycled materials in manufacturing process.

Paints & Coatings

‘Paints & Coatings’

Selection of paints and coatings for the building interiors is critical for enhancing the indoor air quality and occupants’ health and well-being. Paints with very high Volatile Organic Compounds (VOCs) and hazardous substances can have significant ill effects on human health. Some of the hazardous substances such as mercury, lead, hexavalent chromium etc. are carcinogenic.

Green buildings demand use of very low VOC paints and paints that are complying to RoHS (Restriction on Hazardous Substances) guidelines. GreenPro enables the end-users in choosing paints that contribute to enhancing indoor air quality thereby enhancing health and well-being of the occupants.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Very low VOC (or) Near zero VOC leads to improvement in Indoor Air Quality
- Improves the occupant’s health and well-being
- Helps in achieving green building rating by contributing to indoor air quality.

Application

- Interior & Exterior Applications
- Heat reflective coatings
- Building surface protection

Vinayak Industries

About Manufacturer

Established in the year 2012, Vinayak Industries have steadily grown giving the finest services from past 9 years. They gather real time data and customer feedback from time to time making a covalent bond which turns out as company's USP. They have covered 10+ millions of sq ft and growing with Summerseal- Solar Heat Reflective Paint/Cool Roof Coating becoming a prime manufacturer in it's segment followed by other functional paints like Anti-Insect Paint, Glow in Dark Solution, Wall-a-board Coating, and PU Coating.

The company's vision is to save nature with the likes of products that makes living smoother and saves environment for betterment of mankind. Their aim is to enhance the perception of living and to bring good fortune to humanity and nature, with new and technologically improved products to the society.

Green Product Features

- Environmentally Low Volatile Organic Compounds (VOC) emissions.
- High Solar Reflective Index of SRI >110.
- Restriction of hazardous substances.

GreenPro EcoLabelled Products

- Summer Seal - Solar Reflective Paint

Zydex Industries

About Manufacturer

Established In 1997, Zydex is a specialty chemicals company with the purpose of innovating to create a sustainable world through conservation of resources. Zydex offers a diverse set of chemical technologies for the Textile, Agriculture, Pavement and Construction Industries.

Zydex is dedicated to promoting sustainable chemistries to create a greener future for all. Their unwavering commitment has established us as a leader in the development of non-polluting and non-hazardous technologies that safeguard and improve the environment. Their passion lies in advancing chemical innovations that foster a safer, greener, and more resource-efficient world.

Green Product Features

- Paints manufactured have ultra-low VOC.
- No consumption or production of hazardous substances.
- Free of aromatic and halogenated hydrocarbons.

Pipes

'Pipes'

Pipes are eco-friendly components that use sustainable materials and technologies to reduce water consumption, energy use, and environmental impact. They contribute to efficient water supply, drainage, and HVAC systems, integrating with innovations like rainwater harvesting and graywater recycling to enhance sustainability and reduce the building's carbon footprint.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Optimized flow rate for water conservation.
- Reduces building water demand and results in minimal energy required for treatment.
- Helps in achieving green building rating.

Application

- Interior Plumbing
- Wastewater Management
- Industrial Processes

Companies

The following companies have achieved 'GreenPro' certification for their products.

- Ashirwad Pipes Pvt. Ltd.
- Astral Limited
- HIL Limited
- HSIL
- Skipper Limited
- Supreme Industries Ltd

Note: For detailed list of GreenPro Certified products under each manufacturer, refer www.ciigreenpro.com

Ashirvad Pipes Pvt. Ltd.

ashirvad
by aliaxis

About Manufacturer

Ashirvad Pipes has been the benchmark of quality in the Indian water management industry since 1998, who adhere to the highest international standards set for manufacturing products for potable water supply through smart solutions and intelligent technologies that ensure sustainability and convenience.

Green Product Features

- Absence of heavy metals such as Lead, Cadmium, Hexavalent Chromium and hazardous substances.
- Use of regionally sourced and manufactured raw materials in manufacturing process.
- Reduces building water demand and results in minimal energy required for treatment.
- Optimized flow rates for water conservation.

Plumbing Fixtures & Sanitaryware

‘Plumbing & Fixtures’

Plumbing fixtures and Sanitaryware mentioned here refer to various water outlets in a building that include water closets, urinals, shower heads, lavatory faucets, sink faucets, various water sprays etc.

GreenPro enables the end users to choose fixtures which are water efficient and are manufactured resource efficiently and with locally sourced raw materials. It also ensures that fixtures used are free from hazardous substances.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Optimized flow rate for water conservation.
- Reduces building water demand and results in minimal energy required for treatment.
- Prevents bad odor

Application

Interior Plumbing, Kitchen, Institutional Buildings

Companies

The following companies have achieved ‘GreenPro’ certification for their products.

- CERA Sanitaryware Limited
- Hansgrohe India Private Limited
- Hindware Limited (HSIL)
- Kajaria Bathware Pvt. Ltd.
- Jaquar
- Sloan India Private Limited

Note: For detailed list of GreenPro Certified products under each manufacturer, refer www.ciigreenpro.com

CERA Sanitaryware Limited

About Manufacturer

Style; Innovation; Leadership are The three words that capture the essence of CERA Sanitaryware Limited, India's fastest growing company in the segment.

Keeping the needs of the modern customer in mind, CERA opens the doorway to the world of style. An extensive product portfolio that includes high end showers, steam cubicles, and whirlpools, besides sanitaryware and faucets, has made CERA the primary choice of customers looking for stylish products in a contemporary lifestyle. CERA's constant innovations have given several path breaking contributions to the industry. Some of its innovations have become benchmarks for the industry—like water-saving twin-flush coupled WCs, 4-litre flush WCs, and one-piece WCs.

Green Product Features

- Absence of heavy metals such as Lead, Cadmium, Hexavalent Chromium.
- Use of regionally sourced and manufactured raw materials in manufacturing process.
- Use of raw materials with recycled content in manufacturing process.
- Reduces building water demand and results in minimal energy required for treatment.
- Optimized flow rates for water conservation.

Hansgrohe India Pvt. Ltd.

About Manufacturer

In 1901, Hans Grohe founded a craft business for metal-spun goods in the Schiltach, in the Kinzig valley – venturing to make a new start. He discovered the production of metal goods like brass pans, watch parts, and stovepipe rosettes. From the beginning, tin showers were part of the product range from Hans Grohe's small, three-man operation. The private household bathroom came into fashion at the turn of the 20th century. Hans Grohe recognized the shower as an affordable alternative to the lavish process of bathing in a bath tub, and soon began specializing entirely in metal goods for the sanitation section.

Green Product Features

- Water efficient products for optimized flow.
- Use of recycled raw materials to the tune of 40%.
- Resource efficient manufacturing process.
- Green initiatives implemented in Packaging and Supply Chain.

GreenPro EcoLabelled Products

- Ecosmart Series of Shower

Ready Mix Concrete

‘Ready Mix Concrete’

Concrete is an essential part of a building construction. Materials and resources used for concrete making leads to significant amount of GHG emissions. Selection of right type of concrete is critical for individual applications and reducing the GHG emissions.

Ready Mix Concrete offers opportunity to design and develop application specific concrete and reduce the materials and related resource consumption. Use of application specific ready-mix concrete enhances the overall green building performance. GreenPro enables the end-users to choose the following application specific RMC:

- Low Density Concrete for Non- Structural and Structural Applications,
- Self-Compacting Concrete,
- Concrete with high supplementary cementitious materials,
- Pervious concrete,
- High strength concrete
- Durable Concrete

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Utilization of increased quantity of supplementary cementitious which reduces cement consumption and hence reduction in cost of construction.
- Use of application specific concrete leading to relevant benefits such as reduction in energy and water consumption during construction and operation
- Helps in achieving credits in Green Building Rating system.

Companies

The following companies have achieved ‘GreenPro’ certification for their products.

- ACC Limited
- Godrej & Boyce Mfg. Co. Ltd. Godrej Construction
- IJM Concrete Pvt. Ltd.
- Nuvoco Vistas Corp Ltd
- Prism Johnson Limited - RMC India
- UltraTech Cement Limited – RMC Division

Note: For detailed list of GreenPro Certified products under each manufacturer, refer www.ciigreenpro.com

ACC Limited

About Manufacturer

ACC Limited is one of India's leading manufacturers of cement and ready mix concrete with 17 cement factories, 75 ready mix concrete plants.

Sustainability is an integral part of ACC's business strategy with its Sustainable Development 2030 plan focusing on four broad themes: Climate, Circular Economy, Water & Nature and People & Communities.

Green Product Features

- High workability and flowable mix concrete eliminating the use of vibrators.
- Use of crushed stone sand instead of river sand for manufacturing of RMC.
- Can resist chloride-induced or carbonation induced corrosion, weathering action, chemical attack.
- Encourage use of low-density insulating material leading to increased thermal insulation for the building envelope.

Godrej & Boyce Mfg.- Godrej Construction

About Manufacturer

Godrej Construction is a strategic business unit of the highly diversified, Godrej & Boyce Mfg. Co. established in 1897. By imbibing the Godrej Group's core values, Godrej Construction has earned a reputation for meeting international quality standards while preserving the environment. Our competencies include expertise in construction materials, development of modern living spaces and leasing state-of-the-art commercial real estate. We offer a wide range of construction materials which include specially engineered ready mix concrete products, AAC blocks, recycled concrete blocks and pavers for different types of applications.

Green Product Features

- High workability and flowable mix concrete eliminating the use of vibrators.
- Use of crushed stone sand instead of river sand for manufacturing of RMC.
- Contributes to savings in material, energy and reduction in noise.

Roofing Sheets

‘Roofing Sheet’

Roofing sheets are durable, weather-resistant materials used in building construction to provide protection from the elements. They come in various materials, including metal, asphalt, and PVC, and can be used for residential, commercial, and industrial roofing. Roofing sheets offer a lightweight, cost-effective solution with a range of styles and colors to suit architectural and environmental needs, making them a versatile choice for different building projects.

GreenPro enables the end users to choose highly efficient roofing sheets which are manufactured resource efficiently. It also ensures that the degradation overtime is of a lower rate ensuring a sustained high efficient energy generation.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Has excellent weather resistance properties.
- Lightweight enables the handling and transportation easy.
- Helps in achieving credits in Green Building Rating system.

Companies

The following company have achieved ‘GreenPro’ certification for their products.

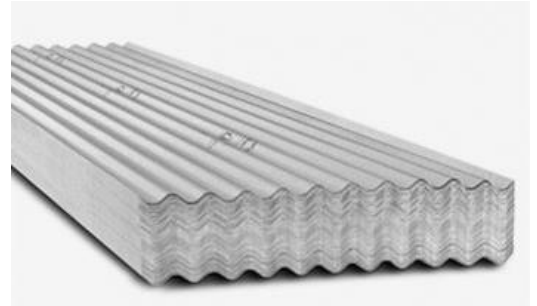

- JSW Steel Ltd

Solar Photovoltaic Module

‘Solar Photovoltaic Module’

Renewable energy usage in India has come about a long way contributing to about 31% of the total power generated. Of the various means of renewable power generation, usage of Solar Photovoltaics for the purpose, is the most popular with a smaller number of constraints.

GreenPro enables the end users to choose high efficient Solar PV modules which are manufactured resource efficiently. It also ensures that the degradation overtime is of a lower rate ensuring a sustained high efficient energy generation.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Use of high efficiency energy modules for building energy requirements.
- Contributes to green buildings through prime performance of modules due to low degradation rate.

Companies

The following company have achieved ‘GreenPro’ certification for their products.

- Waaree Energies Ltd

Waaree Energies Ltd

About Manufacturer

JSW Waaree Energies Ltd. is the flagship company of Waaree Group, founded in 1989 with headquarters in Mumbai, India. It has India's largest Solar PV Module manufacturing capacity of 2 GW's at its plants in Surat and Umbergaon in Gujarat. Waaree Energies is amongst the top player in India in providing EPC services, project development, rooftop solutions, and solar water pumps and also as an Independent Power Producer. Waaree has its presence in over 350 locations nationally and 68 countries internationally.

Waaree's Vision is to provide high quality and cost effective sustainable energy solutions across all the markets, reducing carbon foot print - paving way for sustainable energy thereby improving quality of present and future human life.

Green Product Features

- Use of high efficiency energy modules for building energy requirements.
- Contributes to green buildings through prime performance of modules due to low degradation rate.

Steel Rebars

‘Steel Rebars’

Steel rebar is one of the most important elements of a building structure alongside concrete. Its high strength makes it a suitable choice for reinforcing the building structure enabling the long life of the structure. Generally, steel reinforcement gives a concrete structure the stability it needs. It's designed on the principle that steel and concrete act together to produce a stronger structure that can withstand induced forces. GreenPro enables the end users to choose steel rebars which are manufactured resource efficiently and with lower impact on the environment.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- High strength rebars for high-rise applications.
- High ductility and corrosion resistance enabling long life of the structure.
- Reduced environmental impact.

Companies

The following companies have achieved ‘GreenPro’ certification for their products.

- ARS Steels & Alloys International Pvt. Ltd
- Arya Steels Rolling Pvt. Ltd.
- Bhagwati Steel Cast Pvt. Ltd
- Devashree Ispat Pvt. Ltd.
- Bhagylaxmi Rolling Mill Ltd.
- Electrotherm (India) Limited
- Ganraj Ispat Pvt. Ltd
- Gajkesari Steels & Alloys Pvt. Ltd.
- Gallant Isapt Ltd.
- GASHA Steels Pvt. Ltd
- Geetai Steels Pvt. Ltd
- Guardian Castings Pvt. Ltd
- Haq Steels & Metaliks Ltd.
- Jaideep Ispat & Alloys Pvt. Ltd.
- Jaideep Metallics & Alloys Pvt. Ltd
- JSW Steel Ltd
- Kalika Steel Alloys Pvt. Ltd.
- Matsyodari Steel & Alloys Pvt. Ltd.
- Meenakshi Bright Steel Bars Pvt. Ltd.
- Meenakshi Udyog (India) Pvt. Ltd.
- Metarolls Ispat Pvt. Ltd
- Metrolla Steels Ltd
- Mono Steel (India) Ltd.
- MSP Steel & Power Ltd.
- Omsairam Steels and Alloys Pvt. Ltd

- Panchakanya Steel Pvt Ltd.
- Peekay Rolling Mills Pvt. Ltd.
- Petropol India Ltd.
- Prakash Sponge Iron & Power
- Pulkit Steels Pvt. Ltd.
- Radha Smelters Pvt. Ltd.
- Rathi Steel & Metal Pvt. Ltd.
- Rudra Global Infra Products
- Sai Bandhan Infiumium Pvt
- SBF Ispat Pvt. Ltd.
- SAIL – Steel Authority of India Ltd
- Shakambhari Ispat and Power Limited
- Shivkrupa Steel & Alloys Pvt. Ltd.
- Shreeyam power and steel industries Limited
- Shyam Steel Manufacturing Ltd.
- SRMB Srijan Pvt. Ltd.
- SRJ Peety
- Sunvik Steel TMT
- Surya Ferrous Alloys Pvt. Ltd.
- SuryaDev Alloys & Power Pvt. Ltd.
- Tata Steel Ltd.
- Tulsyan NEC Ltd.
- Viki Industries Pvt. Ltd.

Arya Steels Rolling India Pvt Ltd

About Manufacturer

Arya Steels Rolling India Pvt Ltd is located in Kohlapur .They are manufacturing TMT rebar under brand SHIRIDI TMT. Arya Steel Group have been producing high quality Thermex Steel TMT Bars since the year 2005. It has been pioneer in the sector amongst the industries in Kolhapur. Acclaimed and certified by BIS (ISI) and ISO 9001 : 2000, Fe-500 grade steel TMT bars is powerful, superior material available from 6mm to 32mm in diameters. Arya Steel Group also produces Fe-500D, Fe-550 D quality steel TMT Bars.

Green Product Features

- High strength rebars for high-rise applications.
- High ductility and corrosion resistance enabling long life of the structure.

GreenPro EcoLabelled Products

- Fe 500, Fe 500D, Fe 500 CRS, Fe 500D CRS

PEEKAY Rolling Mills Pvt. Ltd

About Manufacturer

Peekay Rolling Mills is the flagship company of PeekayGroup, which has business interests in fields as varied as steel rolling mills, flour mills, real estate, construction, plantations and medical care. Peekay has developed a sustainable manufacturing methodology which focuses on Innovation, energy efficiency and optimization of resource consumption. It involves use of renewable energy, minimal generation of solid waste & responsible disposal of same, water conservation, Bio-diversity protection and ensuring quality of emissions. Peekay has moved to direct rolling which eliminates use of fuel for re-heating purpose. It reduced the carbon footprint of the product significantly. The manufacturing plant is the most advanced and automated, which offers a safe working environment to employees. Peekay also ensures the welfare of its employees and public.

Panchakanya Steel Pvt. Ltd.

About Manufacturer

Panchakanya Steel was established in 1982 with a 415 grade rebar and later introduced new technology from Germany, a process that is Thermo Mechanically Treated (TMT) for the first time in Nepal in 2002. Today TMT has become a standard for all rebars in Nepal since its introduction.

Panchakanya Group's commitment towards excellence in quality production was first recognized in the year 1998 when Nepal Bureau of Standards (NS) awarded the first NS mark and a certificate in the country to Panchakanya steel and also was the first steel management certified company in Nepal to have the ISO: 9001:2008 by Lloyds' Quality Assurance Register in the year 2001.

Green Product Features

- High strength rebars for high-rise applications.

Prakash Sponge Iron and Power Pvt. Ltd.

About Manufacturer

PSIP is part of ERM GROUP, which has more than 4 decades of experience in the field of Iron & manganese ore mining and steel manufacturing, plant located at Heggere & Kaparahalli villages in Challakere taluk of Chitradurga district, Karnataka.

TURBOSTEEL is the brand name of products manufactured at Prakash Sponge Iron and Power Private Limited (PSIP).

PSIP also produces the sponge iron required for steel making. As forward integration, we use induction furnaces and superior equipment such as MSS convertor and LRF (Ladle refining furnace) to produce high quality liquid steel. This is then cast by continuous casting machine to produce Low Phosphorous Sulphur (LPS) Mild Steel billets and now recently into steel re-bars.

Green Product Features

- High strength rebars for high-rise applications.
- High ductility and corrosion resistance enabling long life of the structure.
- Resource efficient manufacturing process.

Radha Smelters Pvt. Ltd.

About Manufacturer

Established in 1966 Radha Smelters Pvt Ltd is one of best known manufacturers of TMT bars, Mild Steel Bar, Steel Bar and Steel Flat.

Radha Smelters launched their new factory which will use the most modern and world class technology to manufacture TMT bars. Ladle Refining Furnace (LRF) Technology is used to improve the quality of liquid steel through refining, purifying and fine-tuning of its chemistry, LRF is used to raise heat temperatures while simultaneously reducing loss of heat during refining. This technology for producing steel bars will make the bars more flexible, ductile, weldable and provide very high strength.

Green Product Features

- High strength rebars for high-rise applications.
- High ductility and corrosion resistance enabling long life of the structure.

Structural Steel

‘Structural Steel’

Structural steel is a key building material in green construction due to its sustainability, durability, and flexibility. It is highly recyclable, with a significant portion of steel being made from recycled materials. Steel's inherent strength allows for efficient design, reducing material usage and waste. Moreover, steel buildings often have long lifespans, reducing the need for replacements and renovations, and they can be disassembled and reused, minimizing construction-related waste.

In green buildings, the use of structural steel helps lower energy consumption and greenhouse gas emissions due to its lightweight properties, allowing for more open and flexible spaces, which can maximize natural light and reduce the need for artificial lighting and heating or cooling systems.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Use of structural steel in building improves stability and durability.
- Use of recycled scrap steel lowered CO₂ Emissions.
- Steel products do not emit any toxic chemical.

Companies

The following company has achieved ‘GreenPro’ certification for their products.

- Durgapur – Steel Authority of India
- Embosal Tube Mills LLC
- Jindal Steel and Power Pvt. Ltd.
- MSP steel

Note: For detailed list of GreenPro Certified products under each manufacturer, refer www.ciigreenpro.com

EMBOSAL Tube Mills LLC

About Manufacturer

Embosal Tube Mills is Located in Al Ghail (Ras Al Khaimah), United Arab Emirates with the installed combined capacity of 1.5 Million Tons per annum. They are equipped with advanced state of art production machineries in large well organized factories.

They are designed to produce precision square and rectangular tubes with specification range of 30x30x2mm to 800x800x- 40mm. and RHS 35x30x2mm to 800x750x40mm. Also they are equipped with other production lines starting from 1" dia to 250" dia pipes in different thickness from 2mm to 80mm. All the products are widely used in machinery, large construction, bridge, airports, ship building purposes etc. Manufacturing plant uses sustainable energy saving practices.

Green Product Features

- Manufacturing plant uses renewable energy.
- Usage of Recycled content in steel products.
- Quality management system in line with the requirements of ISO 9001:2015.

MSP Steel and Power Ltd.

About Manufacturer

At MSP, they manufacture H beams, I Beams, Channels, Angles, and Round bars which conform to BIS certified quality standards thereby fulfilling consumers' requirements for multiple industries contributing to building the nation of tomorrow.

Process Quality management is at their core when it comes to manufacturing wide range of products. A rigorous Quality Management System conforming to ISO 9001:2015 standards helps maintain a benchmark in production quality. They are equally committed to the environment and hence comply with Environment Management Norms (14001:2015). Their workforce dedicatedly follows the Health & Safety Management System (45001:2018)

Green Product Features

- Manufacturing plant uses renewable energy.
- Usage of Recycled content in steel products.
- Quality management system in line with the requirements of ISO 9001:2015.

GreenPro EcoLabelled Products

- I Beam
- H Beam
- Angle Sections
- Round Bars

Tiles

'Tiles'

Tiles can be broadly classified into ceramic or vitrified typically glazed for internal uses and unglazed for roofing purposes. The roof tiles can have solar reflective coatings for minimizing the heat gain in the buildings.

GreenPro enables the end users to choose tiles which are manufactured resource efficiently and with locally sourced raw materials. It also ensures that tiles used for interior applications are free from hazardous substances.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Use of high SRI tiles reduces the heat gain in the buildings.
- Contributes to green buildings through material conservation and resource efficiency.

Companies

The following companies have achieved 'GreenPro' certification for their products.

- AET Building Products (WI) Pvt. Ltd
- Armstrong World Industries (India) Pvt. Ltd
- Carbon Craft
- Icon Granito Private Limited
- Kajaria Ceramics Limited
- Kajaria Infinity Pvt. Ltd.
- Nexion Surfaces Pvt. Ltd.
- Prism Johnson Limited
- Simero Vitrified Tiles Pvt. Ltd.

Note: For detailed list of GreenPro Certified products under each manufacturer, refer www.ciigreenpro.com

AET Building Products (WI) Pvt. Ltd.

About Manufacturer

AET Building Products (WI) Pvt. Ltd, have been pioneers in the design, development and manufacturing of Raised Access Floors since its inception in India. Spread over an area of 60,000 sq. ft., their manufacturing unit is state-of-the-art facility that is compliant with ISO 9001:2015 Quality Management Systems. All the raw material that goes into the FLEXI ACCESS FLOOR systems are procured locally.

AET Flexiblespace India Pvt. Ltd. aims to provide a complete package of Raised Flooring Environment Solutions to their esteemed clients.

Green Product Features

- Low concentration of heavy metals.
- Use of ROHS compliant low VOC coating.
- No formaldehyde and aromatic hydrocarbons used.
- Contributes to enhancing the health and well-being of occupants.

GreenPro EcoLabelled Products

- FLEXI Steel Cementitious Tile
- FLEXI Steel Cementitious Tile with High Pressure Laminated Finish
- FLEXI Steel Cementitious Tile with Wooden Finish
- FLEXI Steel Cementitious Tile with Vitrified Tile Finish

Armstrong World Industries

Your ideas become reality.

About Manufacturer

Armstrong World Industries, Inc. (AWI) is a global leader in the design and manufacture of innovative commercial and residential ceiling, wall and suspension system solutions. With over 3,800 employees and fiscal 2016 revenues from ceiling operations more than \$1.2 billion, AWI has a global manufacturing network of 26 facilities, including nine plants dedicated to its WAVE joint venture. On April 1, 2016, AWI completed the separation of its legacy flooring business that now operates as Armstrong Flooring, Inc., an independent, publicly-traded company.

Green Product Features

- Recycled content
- Enhanced Acoustic performance
- RoHS compliant
- Highly reflective thereby enhances daylight

Carbon Craft

About Manufacturer

Carbon Craft design is a Mumbai based design and material innovation company started in 2016. They are a group of Architects and Engineers developing carbon upcycling products for the world's construction demands to mitigate Air Pollution at scale.

Their business streams include Carbon Craft tiles which are completely handcrafted for interior application from floors to walls. The range of tiles includes plain and patterned tiles in various sizes and are also customisable. The available sizes include 9"x3" plain brick tiles for wall application. The range of Carbon Craft plain tiles includes 8"x8", 10"x10", 12"x12", 16"x16", and 20"x20" and 8"x8" patterned tiles for floor application.

Green Product Features

- The final product contains 75% recycled content.
- Can sequester 0.9 Kg CO_{2e}/sqft.

Ventilation Fans & Air Handling Units

‘Ventilation Fans and Air Handling Units’

Ventilation fans and air handling units are integral components of green buildings, prioritizing energy efficiency and indoor air quality. Ventilation fans facilitate fresh air supply and indoor air purification, often employing energy-saving technologies and sensors for efficient operation. Air handling units’ condition and distribute air while minimizing energy consumption through features like energy-recovery systems and advanced filtration. These systems contribute to sustainable building operation by promoting a healthy indoor environment and reducing the environmental impact, aligning with the principles of green construction.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Use Better indoor air quality to enhance wellbeing of occupants by limiting contaminants such as particulate matter, microbial count etc.
- Use of ventilation fans & air handling units solutions in buildings can lead to award of credits towards ‘Indoor Environmental Quality’ aspect in green building ratings

Companies

The following companies has achieved ‘GreenPro’ certification for their products.

- Delta Electronics India Pvt. Ltd
- Systemair India Pvt. Ltd

Delta Electronics India Pvt. Ltd

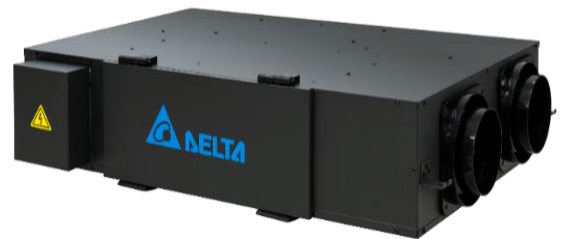

About Manufacturer

Delta, founded in 1971, is a global provider of power and thermal management solutions. Its mission statement, "To provide innovative, clean and energy-efficient solutions for a better tomorrow," focuses on addressing key environmental issues such as global climate change. As an energy-saving solutions provider with core competencies in power electronics and automation, Delta's business categories include Power Electronics, Mobility, Automation, and Infrastructure.

Green Product Features

- Use Reduces energy and power consumption.
- Good for interior design
- It helps reduce noise output.

GreenPro EcoLabelled Products

- Ventilation Fan
- Ceiling Mount Type with Duct
- Ceiling Mount Type with washable filter
- In-line exhaust fan
- In-line Supply Fan with HEPA Filter

Systemair India Pvt. Ltd.

About Manufacturer

Systemair offers the most suitable, energy-optimised air handling units for any project, from large, flexible, modular solutions to small and compact single units. At Systemair, they look to combine the best elements of both to provide exceptional indoor air quality while contributing to a more sustainable planet.

Green Product Features

- Use of greener steel which has a 70% lower carbon footprint than 'normal' steel.
- Can recover the energy from ventilation.

GreenPro EcoLabelled Products

- Air Scrubber
- Ventilation Fan
- Square Duct Fans
- Smoke Extract Fans
- Roof Axial Fan
- Wall Mounted Axial Fan

Wastewater Treatment System

‘Wastewater Treatment System’

Wastewater treatment systems are a localized alternative to the municipal sewer systems where you can reclaim the water for reuse in flushing and gardening thereby reducing the freshwater requirement.

GreenPro enables the end users to choose systems which are manufactured to treat wastewater efficiently. It also ensures that the reclaimed water is suitable for reuse free of odor and other contaminants present earlier in its sludge form.

Benefits & Contribution to Green Building Requirements

The GreenPro EcoLabelled Products under this category leads to:

- Lesser load on the municipal sewer system.
- Water can be reused, reducing freshwater consumption.

Companies

The following companies have achieved ‘GreenPro’ certification for their products.

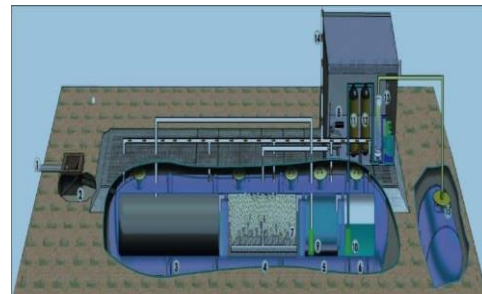

- Arvind Envisol Ltd.
- Delta Daiki Axis India Pvt. Ltd.
- JalSevak Solutions

Arvind Envisol Ltd.

About Manufacturer

Launched in 2011, as part of Arvind Limited, the 1.3 billion USD global textile conglomerate, Arvind Envisol is a world-class water management company providing end-to-end solutions for water treatment, industrial wastewater treatment, sewage treatment and zero liquid discharge solutions at minimal costs. The company's patented polymeric film evaporation technology brings you the world's most economical evaporation technology, minimising your operating costs and it's zero liquid discharge solutions show how to combine optimum sustainability with your business's profitability.

Envisol
POWERED BY **ARVIND**

Green Product Features

- Treated wastewater quality meets CPCB parameters such as pH, BOD, COD and TSS.
- Decomposition of organic waste is consistent throughout the year.

JalSevak Solutions

About Manufacturer

JalSevak Solutions (जलसेवक) aims to address an important and often overlooked problem faced by Indian cities and towns: Absence of wastewater recycling. They have developed India's first compact, on-site, and affordable greywater recycling solution for residential and commercial facilities. Their engineered systems are convenient, scalable, and sustainable. The treated greywater can be used for activities such as toilet flushing, gardening/landscaping, and floor cleaning.

Green Product Features

- The 'Washroom Wastewater Recycler' can recycle up to 500 liters of greywater per hour.
- This plug-and-play unit can be installed at commercial facilities such as community toilets, public bathrooms, restaurants, etc.
- Recycles the greywater generated from activities such as hand washing, dishwashing, washing clothes, and bathing on-site.
- Recycled water is used in flushing toilets and urinals or gardening.

Confederation of Indian Industry

About CII – Green Products & Services Council

The Green Products and Services Council was formed by CII-Sohrabji Godrej Green Business Centre, CII’s Developmental Institute on Green Practices & Businesses.

The objective of the Council is to facilitate Green Product Market Transformation in India.

The Council is committee-based, member-driven and consensus-focused. The Council involves all major stakeholders including Government, Product Manufacturers, Standard Developers, Conformity Agencies, Product Testing Laboratories, Academia.

The Green Products and Services Council presently offers GreenPro Certification for Materials, Products and Technologies. The Standards are developed based on consensus by Technical Committees involving all major stakeholders.

About Confederation of Indian Industry (CII)

The Confederation of Indian Industry (CII) works to create and sustain an environment conducive to the development of India, partnering Industry, Government and civil society, through advisory and consultative processes.

CII is a non-government, not-for-profit, industry-led and industry-managed organization, with around 9,000 members from the private as well as public sectors, including SMEs and MNCs, and an indirect membership of over 300,000 enterprises from 286 national and regional sectoral industry bodies

With 65 offices, including 10 Centres of Excellence, in India, and 8 overseas offices in Australia, Egypt, Germany, Indonesia, Singapore, UAE, UK, and USA, as well as institutional partnerships with 350 counterpart organizations in 133 countries, CII serves as a reference point for Indian industry and the international business community.
